Stereotypes and Language Learning Motivation Larisa Nikitina 2020-04-28 This book explores stereotypes that learners of six Asian languages—Japanese, Mandarin, Korean, Myanmar, Thai and Vietnamese—hold about the target language country, its cultures and people. Some of the findings, such as the language learners' mental images of Myanmar, Thailand and Vietnam, are presented here for the first time. Recognizing that stereotypes, and attitudes embedded in them, have an impact on people's actions and behavioural intentions, this book examines whether and how the country stereotypes held by the students influenced their motivation to learn the target language. Besides providing worthwhile insights into the content and structure of the country stereotypes and their relationship with language learning motivation, this book offers methodological and theoretical advancements. Drawing on intellectual heritage of Russian psychologist Lev Vygotsky (1896-1934) the book highlights how the concepts of word meaning (znachenie slova) and word sense (smysl) could be fruitfully employed in studies on stereotypes that people learning a foreign language hold about a target language country. This book will appeal to all readers interested in stereotypes that people have about foreign countries and also to educators and researchers who study language learning motivation.

A New Companion to Homer Ian Morris 1997 This volume is the first English-language survey of Homeric studies to appear for more than a generation, and the first such work to attempt to cover all fields comprehensively. Thirty leading scholars from Europe and America provide short, authoritative overviews of the state of knowledge and current controversies in the many specialist divisions in Homeric studies. The chapters pay equal attention to literary, mythological, linguistic, historical, and archaeological topics, ranging from such long-established problems as the "Homeric Question" to newer issues like the relevance of narratology and computer-assisted quantification. The collection, the third publication in Brill's handbook series, "The Classical Tradition," will be valuable at every level of study - from the general student of literature to the Homeric specialist seeking a general understanding of the latest developments across the whole range of Homeric scholarship.

Waqf Development and Innovation Syed Nazim Ali 2021-11-30 Waqf is one of the most potent socio-economic tools for reducing public sector deficit and breaking the chain of intergenerational poverty. Providing a high-level discussion on waqf development and innovation within the context of modern socio-economic and legal developments, this book examines the importance and potentials of waqf and the issues relating to its legal and regulatory framework. The research delivers future directions for countries that plan to explore this socio-economic institution. Readers and policymakers will be able to replicate successful experiments and learn from some failed initiatives to seek alternative funding platforms to support the fiscal policies of developing countries. The volume discusses the relevance and novel application of waqf in the modern economic system and social development, it reviews applicable laws and regulations pertaining to waqf and trust laws and examines critical, cross-country case studies and experiences. Setting an agenda for further researchers in the field of waqf, this comprehensive high-level analysis, with case studies from leading jurisdictions across the world, is a key resource for researchers, policymakers and institutions interested in charitable endowments, Islamic finance, and social finance.

Language Teaching and Learning Debbita Tan Ai Lin 2014-06-19 In every discussion on the role that language plays in our lives, every orator - from prominent politicians and corporate figures to linguists, educational experts, and others - concedes that language is important in all spheres of life.

Language is both personal and introspective, as well as public and communal. Without it, we would not be able to communicate and articulate our thoughts and feelings to ourselves, to those in our inner circles, and to those in the world at large. Without it, we would not be able to establish partnerships and collaborations, and to unite peoples of diverse backgrounds and intrinsic values. Without it, too, we would not be able to learn new discoveries and gain new knowledge. The nurturing of a language learning culture is of the utmost importance to ensure that language teaching and learning supports the development of individuals, societies, nations, and populations. Language researchers, educators, and practitioners need to ensure that their learners are empowered to remain relevant. They need to produce critical and analytical thinkers, and successful language users in listening, speaking, reading, and writing. The collection of chapters in this volume addresses language teaching and learning dilemmas and draws attention to the challenges researchers have overcome and those they continue to face. The book chapters here reflect the transcendence by language teaching and learning of ordinary boundaries, especially with the advent of the digital revolution, and provide new perspectives, pedagogies, and approaches that help shape ethical, responsible, and sustainable policies. Readers of this volume, whether language practitioners, students, researchers, policy- and decision-makers, concerned educationists, or any interested individual, will gain new insights and experiences as they explore new identities, new instructional media for interactive teaching and learning and new modes of meaning in diverse local and global contexts.
