U.S. Navy, U.S. Marine Corps and MATS Aircraft Lost During the Korean War: 2017 Edition Douglas E. Campbell 2016-10-19
The Korean War was the first war in which jet aircraft played a central role. For the initial months of the war, the F9F Panther and other jets dominated North Korea's prop-driven air force and later held their own against the MiGs. Within these pages are listed more than 1,140 U.S. Navy, U.S. Marine Corps and Military Air Transport Service (MATS) aircraft lost during the Korean War. These aircraft were spread across 19 different ships, 126 different squadrons, by 12 aircraft manufacturers building nearly 60 different types and variants to fly into war. The information on dates lost, aircraft type and manufacturer, Bureau Numbers, ship or base assigned, squadron attached, and fate of the pilot and crew, are here. In this 2017 Edition, an alphabetized index of nearly 1,300 names of pilots and crewmembers listed in the book has been added.

B-29s Over Japan, 1944-1945 Samuel Russ Harris, Jr. 2011-06-10 This diary focuses intensely on Col. Samuel Russ Harris' life within his own 499th Bomb Group and his relationship with the 73rd Bomb Wing's operations. The first section of the book is an intimate portrait of war. To provide a context of the B-29 war against Japan, the second half of the text details how the 73rd Bomb Wing was engaged in the war against Japan. Together, the two parts provide a well-rounded portrait of America—and one American—at war.

Super Snoopers Bob Archer 2020-07-21 The US Air Force has performed peripheral reconnaissance adjacent to the traditional foe of Russia, China, North Korea and others for seven decades. Evolving from rudimentary aircraft to an unprecedented level of sophistication, the current, elderly airframes boast unmatched performance. The book details the aircraft, equipment, sensors, air bases involved, and limited operational details-as much remains highly classified. Additionally, stories by the personnel involved, who have flown these mission, and often faced their quarry at very close range. The majority of aircraft involved are the Boeing C-135 series, including more than 100 different airframes, of 48 different versions. Missions include strategic intelligence, airborne command and control, treaty compliance, Open Skies, weather reconnaissance, aerial refuelling, and transportation. Details the different aircraft missions, bewildering programme names, operating locations, and flying units involved. Background support organisations are presented. A potted history of every aircraft involved is included, together with units operated, and designations applied. Sixty years of operations, which continue to this day, are mostly shrouded in secrecy. A cat and mouse adventure, throughout the Cold War, into the new peace dividend, and now in the face of renewed Russian aggression. The veil of secrecy is lifted, ever so slightly!
