Japan Fund for Poverty Reduction Asian Development Bank 2016-03-01 The Japan Fund for Poverty Reduction (JFPR) Annual Report 2014 is the 14th such report and covers the period 1 January – 31 December 2014. It presents JFPR's background and rationale, implementation progress, and achievements. Established in May 2000, JFPR provides direct grant assistance to the poorest and most vulnerable groups in developing members of the Asian Development Bank (ADB) while fostering long-term social and economic development. The grants target poverty reduction initiatives with the direct participation of nongovernment organizations, community groups, and civil society. In 2009, the Government of Japan and ADB expanded the scope of JFPR to include provision of support to developing members through capacity development, policy and advisory, research and development, and project preparatory technical assistance.

Mobile Tech Report 2014 John R. Roberts 2014-01-10 If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2013 and make predictions on what will and won't happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not just in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2014 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, BlackBerry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, Snapchat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2013 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological order. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters. Table of Contents Preface Introduction Chapter 1: 2014 Predictions Chapter 2: Mobile Marketshare Chapter 3: Apple Chapter 4: Samsung Chapter 5: Google Chapter 6: Microsoft Chapter 7: Nokia Chapter 8: BlackBerry Chapter 9: Amazon Chapter 10: Social Media Chapter 11: Yahoo Chapter 12: Carriers Chapter 13: 2013 Predictions Chapter 14: Essays Appendix

Attacks and Defenses for the Internet-of-Things Wenjuan Li 2023-01-11 This book constitutes the post-conference proceedings of the 5th International Workshop on Attacks and Defenses for Internet-of-Things, ADIoT 2022, held in conjunction with ESORICS 2022, in Copenhagen, Denmark, in September 30, 2022, in hybrid mode. The 7 full papers and 3 short papers were carefully reviewed and selected from 18 submissions. This workshop focuses on IoT attacks and defenses and discusses either practical or theoretical solutions to identify IoT vulnerabilities and IoT security mechanisms.

Wiley Not-for-Profit GAAP 2014 Richard F. Larkin 2014-03-20 The most practical, authoritative guide to not-for-profit GAAP Wiley Not-for-Profit GAAP 2014 is a comprehensive, easy-to-use guide to the accounting and financial reporting principles used by not-for-profit organizations. Wiley Not-for-Profit GAAP 2017 provides clear answers and practical guidance to help you streamline GAAP implementation and ensure compliance.

The Neuroscientific Basis of Successful Design Marco Maiocchi 2014-12-01 The term "design" today encompasses attributes of artifacts that go beyond their intended functions, imbuing them with new meanings. Those meanings are deeply related to the emotions perceived by the users. This book investigates the findings deriving from the neurosciences that are relevant to design. Drawing upon up-to-date neuroscientific knowledge, the authors define what an emotion is, examine the relationship between perceptions and emotions and discuss the role of metaphoric communication. Particular attention is paid to those elements of perception and metaphoric interpretation that cause the emotions to rise. Consequences for the design process are then considered and a design process is proposed that takes into account emotional impacts as one of the goals. A solid scientific approach to the subject is maintained throughout and understanding is facilitated by the inclusion of a rich collection of successful design artifacts, the emotional aspects of which are analyzed.

DHCPv6-Pr à fix-Delegation Bilal Al Bakri 2016-05 Mit der rasanten Entwicklung der IP-Netze und der Verbreitung der IPv6, müssen die neuen Anforderungen des Kunden in Betracht genommen werden. Deswegen begannen viele Internetanbieter natives IPv6 anzubieten und dem entsprechend auf die klassischen Übergangstechnologien wie z. B. Tunnel, zu verzichten. IPv6 an sich bietet ein einfaches Autokonfigurationsverfahren, unterstützt allerdings nicht die automatische Pr à fix-Zuweisung. Für die automatische Pr à fix-Zuweisung wird ein effizientes Verfahren benötigt. Das Verfahren soll die Zuweisung von IPv6-Pr à fix von einem ISP bis hin zu den Endgeräten des Kunden automatisieren. DHCPv6 mit der Pr à fix-Delegation-Option stellt hierzu ein ideales Verfahren zur Verfügung. Mit diesem effizienten Verfahren wird das Leben sowohl der Internetanbieter, als auch die der Internetanwender erleichtert. Der Internetanbieter will einen effizienten automatisierten Prozess, welcher seine Kunden zufriedenstellt. Der Internetanwender möchte wiederum seine Geräte einfach und komfortabel an das Netz anschließen und sich um keinerlei Konfigurationen kümmern. Darüber hinaus möchte der Kunde seine Geräte permanent verfügbar und gleichzeitig seine Daten geschützt wissen. Im Rahmen dieser Arbeit werden alle die oben genannten Aspekte im Verbund mit dem DHCPv6-Pr à fix-Delegation-Verfahren erörtert.

Human-Computer Interfaces and Interactivity: Emergent Research and Applications Isaias, Pedro 2014-06-30 In more ways than one, assistive technologies can have a profound impact on humans and their operations within society. Understanding these emerging technologies is crucial to their effective use in improving human lives. Human-Computer Interfaces and Interactivity: Emergent Research and Applications aims to address the main issues of interest within the culture and design of interactive systems for individuals living with disabilities. This premier reference work addresses a range of approaches including, but not limited to, the conceptual, technological, and design issues related to human-computer interaction, issues of interest to a range of individuals including academics, university teachers, researchers, post-graduate students, public and private institutions, and HCI developers and researchers.

Research and Development in Digital Media Rae Earnshaw 2018-01-30 This book presents an overview of the technical underpinnings in the field of digital media. This includes theory, imaging, big data, interaction, and the research and development that is needed in order to make digital media interfaces more natural and easy to use. Grant funding sources for R & D are detailed and current priority areas are summarized. Developments in the relevant commercial areas are also reviewed. This is Professor Earnshaw's fifth book in the series on digital media and its applications and creative uses. These books explain the significance and importance of digital media and how it has developed and advanced. They also explore the impact digital media is having on a range of domains including art and design, the creative industries, visual analytics, big data, and digital humanities. The convergence of IT, telecommunications and media is bringing about a revolution in the way information is being collected, stored, accessed and distributed. Digital media is expected to play an increasing role in these processes. State of the art digital technologies are increasingly utilized in order to deliver to the user requirements and also to be effective and efficient in this delivery, given the increasing demands by users and other third parties involved in the content creation and service delivery pipeline. Research and Development in Digital Media will be invaluable for readers that want a summary of the technical research and development aspects of digital media, how such work is being funded, and the kind of changes in digital media provision that may result.

De lange weg naar de vrijheid Nelson Mandela 2017-10-21 De lange weg naar de vrijheid is de beroemde autobiografie van een van de grootste mannen van de twintigste eeuw. Nelson Mandela beschrijft de lange weg die hij heeft moeten afleggen van onwetende jongen tot charismatisch staatsman. Dit is het verhaal van misschien wel de wonderbaarlijkste omwenteling in de geschiedenis, verteld door de man die het allemaal heeft meegemaakt en in gang gezet. Het verhaal van Mandela, door Mandela.

Macroeconomics R. Glenn Hubbard 2014-09-01 Macroeconomics is the most engaging introductory economics resource available to students today. Using real businesses examples to show how managers use economics to make real decisions every day, the subject is made relevant and meaningful. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the chapter relates to real business situations or was used by a real business to make a real business decision. Solved problems in every chapter motivate learners to confidently connect with the theory to solve economic problems and analyse current economic events.

Al Qaeda, the Islamic State, and the Global Jihadist Movement Daniel Byman 2015-07-23 On the morning of September 11, 2001, the entire world was introduced to Al Qaeda and its enigmatic leader, Osama bin Laden. But the organization that changed the face of terrorism forever and unleashed a whirlwind of counterterrorism activity and two major wars had been on the scene long before that eventful morning. In Al Qaeda, the Islamic State, and the Global Jihadist Movement: What Everyone Needs to Know, Daniel L. Byman, an eminent scholar of Middle East terrorism and international security who served on the 9/11 Commission, provides a sharp and concise overview of Al Qaeda, from its humble origins in the mountains of Afghanistan to the present, explaining its perseverance and adaptation since 9/11 and the limits of U.S. and allied counterterrorism efforts. The organization that would come to be known as Al Qaeda traces its roots to the anti-Soviet jihad in Afghanistan in the 1980s. Founded as the Soviets withdrew from Afghanistan, Al Qaeda achieved a degree of international notoriety with a series of spectacular attacks in the 1990s; however, it was the dramatic assaults on the World Trade Center and the Pentagon on 9/11 that truly launched Al Qaeda onto the global stage. The attacks endowed the organization with world-historical importance and provoked an overwhelming counterattack by the United States and other western countries. Within a year of 9/11, the core of Al Qaeda had been chased out of Afghanistan and into a variety of refuges across the Muslim world. Splitter groups and franchised offshoots were active in the 2000s in countries like Pakistan, Iraq, and Yemen, but by early 2011, after more than a decade of relentless counterterrorism efforts by the United States and other Western military and intelligence services, most felt that Al Qaeda's moment had passed. With the death of Osama bin Laden in May of that year, many predicted that Al Qaeda was in its death throes. Shockingly, Al Qaeda has staged a remarkable comeback in the last few years. In almost every conflict in the Muslim world, from portions of the Xinjiang region in northwest China to the African subcontinent, Al Qaeda franchises or like-minded groups have played a role. Al Qaeda's extreme Salafist ideology continues to appeal to radicalized Sunni Muslims throughout the world, and it has successfully altered its organizational structure so that it can both weather America's enduring full-spectrum assault and tailor its message to specific audiences. Authoritative and highly readable, Byman's account offers readers insightful and penetrating answers to the fundamental questions about Al Qaeda: who they are, where they came from, where they're going-and, perhaps most critically-what we can do about it. What Everyone Needs to Know® is a registered trademark of Oxford University Press.

Audit and Accounting Guide AICPA 2016-10-31 First update in 2 years! This publication includes over 200 pages of invaluable guidance to help you improve your gaming industry knowledge, fine-tune your strategies, and provide high-quality services to your clients. This guide was developed by leading experts from industry and public practice. It summarizes new standards, guidance, and practices and delivers "how-to" strategies for handling audit and accounting issues common to entities in the Gaming industry. It explains the accounting and auditing for many types of Gaming industry issues, including up-to-date information such as recently issued Accounting Standards Updates and GASB Statements and their effect on the industry.

The Semantic Web: ESWC 2013 Satellite Events Philipp Cimiano 2013-09-15 This book constitutes the thoroughly refereed post-proceedings of the satellite events of the 10th International Conference on the Semantic Web, ESWC 2013, held in Montpellier, France, in May 2013. The volume contains 44 papers describing the posters and demonstrations, 10 best workshop papers selected from various submissions and four papers of the AI Mashup Challenge. The papers cover various aspects on the Semantic Web.

Dogecoin - Bitcoin's poor cousin? John Stevenson 2013-12-29 If you've heard of Dogecoin, maybe you thought it was a joke. A cryptocurrency based on what has been called the meme of the year for 2013, it certainly has all the earmarks of an

internet prank. But some people are apparently taking Dogecoin seriously – learn all about this new currency, and how to earn Dogecoins and convert them for real cash!

EBOOK: Economics David Begg 2014-01-16 Economics affects almost everything we do: from our decisions at work to our shopping habits, voting preferences and social attitudes. This new edition of the popular text by David Begg and Gianluigi Vernasca enables the reader to understand today's economic environment by examining the underlying theory and applying it to real-world situations. Economics surveys the latest ideas and issues, such as the role of regulation in banking, the consequences of globalization and monetary union, and the efficacy of our current economic models. This coverage, combined with a rich array of pedagogical features, encourages students to explore our economic past and present, and to think critically about where this might lead us in the future. The new edition is updated to provide a comprehensive analysis of the financial crash: its causes, consequences, and possible policy responses, from fiscal stimulus to quantitative easing.

Business Intelligence Esteban Zimányi 2014-03-20 To large organizations, business intelligence (BI) promises the capability of collecting and analyzing internal and external data to generate knowledge and value, thus providing decision support at the strategic, tactical, and operational levels. BI is now impacted by the "Big Data" phenomena and the evolution of society and users. In particular, BI applications must cope with additional heterogeneous (often Web-based) sources, e.g., from social networks, blogs, competitors', suppliers', or distributors' data, governmental or NGO-based analysis and papers, or from research publications. In addition, they must be able to provide their results also on mobile devices, taking into account location-based or time-based environmental data. The lectures held at the Third European Business Intelligence Summer School (eBISS), which are presented here in an extended and refined format, cover not only established BI and BPM technologies, but extend into innovative aspects that are important in this new environment and for novel applications, e.g., pattern and process mining, business semantics, Linked Open Data, and large-scale data management and analysis. Combining papers by leading researchers in the field, this volume equips the reader with the state-of-the-art background necessary for creating the future of BI. It also provides the reader with an excellent basis and many pointers for further research in this growing field.

Introduction to Internet of Things in Management Science and Operations Research Fausto Pedro Garcí a i a M á rquez 2021-10-30 This book aims to provide relevant theoretical frameworks and the latest empirical research findings in Internet of Things (IoT) in Management Science and Operations Research. It starts with basic concept and present cases, applications, theory, and potential future. The contributed chapters to the book cover wide array of topics as space permits. Examples are from smart industry; city; transportation; home and smart devices. They present future applications, trends, and potential future of this new discipline. Specifically, this book provides an interface between the main disciplines of engineering/technology and the organizational, administrative, and planning capabilities of managing IoT. This book deals with the implementation of latest IoT research findings in practice at the global economy level, at networks and organizations, at teams and work groups and, finally, IoT at the level of players in the networked environments. This book is intended for professionals in the field of engineering, information science, mathematics, economics, and researchers who wish to develop new skills in IoT, or who employ the IoT discipline as part of their work. It will improve their understanding of the strategic role of IoT at various levels of the information and knowledge organization. The book is complemented by a second volume of the same editors with practical cases.

Department of Homeland Security Appropriations for 2015 United States. Congress. House. Committee on Appropriations. Subcommittee on Homeland Security 2014

Retail Market Study 2014 Marc-Christian Riebe 2014-02-01 The Retail Market Study 2014 of The Location Group is the one and only study of its kind with 150 of the most notable international cities of the fashion and retail world and 3'000 store openings on 1,500 pages. Over 1,000 retailers, 800 shopping streets and 500 shopping centers were analyzed. The study reached more than 100,000 readers worldwide so far.

A Practitioner's Guide to European Patent Law Paul England 2022-09-08 This new edition is a comprehensive and practical guide to European patent law – a 'ius commune'. The book highlights the areas of consistency and difference between the most influential European patent law jurisdictions: the European Patent Office, England and Wales, France, Germany, and the Netherlands. The book also draws insights from further afield, with contributions from other, very active, patent jurisdictions, including Italy, Sweden, Denmark, and Switzerland. Uniquely, the book addresses European patent law by subject matter area, assessing the key national and EPO approaches together rather than nation by nation. Each chapter outlines the common ground between the national approaches and provides a guide for the possible application of European patent law in national courts and the UPC in the future. In addition to featuring content on new countries, the second edition includes new chapters dedicated to the substantive aspects of FRAND, declarations, and evidence. There is also an expanded commentary on construction, including common terms used in patent claims. A must-read for anyone working in the field of European patent law.

MKTG 8 Charles W. Lamb 2014-03-26 4LT Press solutions give students the option to choose the format that best suits their learning preferences. This option is perfect for those students who focus on the textbook as their main course resource.

Gambling Regulation and Vulnerability Malgorzata Anna Carran 2018-03-30 Since the UK Gambling Act of 2005 was introduced, gambling has stopped being seen, politically and legally as an inherent vice and is now viewed as a legitimate form of entertainment. Gambling Regulation and Vulnerability explores the laws around gambling that aim to protect society and individuals, examining the differences between regulatory rhetoric and the impact of legislative and regulatory measures.

Malgorzata Carran finds that although the Gambling Act introduced many positive changes to gambling regulation, it has created an environment in which protection of vulnerable individuals becomes difficult. Carran challenges the existing legislative premise that regulation alone is able to balance the effect of liberalisation for those who are vulnerable.

Remedies in EU Competition Law Damien Gerard 2020-07-10 By their nature, remedies are central to competition law enforcement and represent the yardstick against which the efficiency of the overall system can be measured. Yet very rarely have remedies been treated in a horizontal and comprehensive manner from the combined perspectives of substance, process and policy. The present volume, developed in partnership with the College of Europe's Global Competition Law Centre (GCLC), provides coherent, practical, and authoritative commentaries by leading experts from the GCLC's incomparable network. The contributions – originally presented at the 2019 GCLC annual conference – examine remedies to assess the overall effectiveness of competition law enforcement in merger, antitrust and State aid matters. The overall topic is presented under five headings: objectives and limitations of remedies; types of remedies in competition law enforcement; implementation and process; ex post assessment of remedies and policy lessons; and national and international approaches. The high-profile and wide-ranging group of authors includes the Director-General of the European Commission's competition department, lawyers from major international firms, and well-known economists and academics specialising in competition law. With a sharp focus on how to make competition rules work well in today's digital environment, this systematic and coherent analysis illuminates an issue that we need to fully grasp and understand in order to make sense of competition policy, law and enforcement in the years and decades to come.

Paper Tigers, Hidden Dragons Douglas B. Fuller 2016-05-19 China presents us with a conundrum. How has a developing country with a spectacularly inefficient financial system, coupled with asset-destroying state-owned firms, managed to create a number of vibrant high-tech firms? China's domestic financial system fails most private firms by neglecting to give them sufficient support to pursue technological upgrading, even while smothering state-favoured firms by providing them with too much support. Due to their foreign financing, multinational corporations suffer from neither insufficient funds nor soft budget constraints, but they are insufficiently committed to China's development. Hybrid firms that combine ethnic Chinese management and foreign financing are the hidden dragons driving China's technological development. They avoid the maladies of China's domestic financial system while remaining committed to enhancing China's domestic technological capabilities. In sad contrast, China's domestic firms are technological paper tigers. State efforts to build local innovation clusters and create national champions have not managed to transform these firms into drivers of technological development. These findings upend fundamental debates about China's political economy. Rather than a choice between state capitalism and building domestic market institutions, China has fostered state capitalism even while tolerating the importing of foreign market institutions. While the book's findings suggest that China's state and domestic market institutions are ineffective, the hybrids promise an alternative way to avoid the middle-income trap. By documenting how variation in China's institutional terrain impacts technological development, the book also provides much needed nuance to widespread yet mutually irreconcilable claims that China is either an emerging innovation power or a technological backwater. Looking beyond China, hybrid-led development has implications for new alternative economic development models and new ways to conceptualize contemporary capitalism that go beyond current domestic institution-centric approaches.

Wiley Not-for-Profit GAAP 2019 Richard F. Larkin 2019-09-04 The essential not-for-profit GAAP reference, updated with the latest standards Wiley Not-for-Profit GAAP 2019 is the essential accounting resource for not-for-profit organizations, providing quick access to the most up-to-date standards and practical tools for implementation. Wiley Not-for-Profit GAAP 2019 provides clear answers and practical guidance to help you streamline GAAP implementation and ensure compliance.

Microeconomics R. Glenn Hubbard 2014-09-01 Microeconomics is the most engaging introductory economics resource available to students today. Using real businesses examples to show how managers use economics to make real decisions every day, the subject is made relevant and meaningful. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the chapter relates to real business situations or was used by a real company to make a real business decision. Solved problems in every chapter motivate learners to confidently connect with the theory to solve economic problems and analyse current economic events.

Handbook of East Asian Entrepreneurship Tony Fu-Lai Yu 2014-10-03 With the shift of the global economic gravity toward emerging economies and the roaring economic growth of the past three decades in China, East Asian catching-up growth strategies have profound implications for latecomer economies. While there are many handbooks on entrepreneurship in general, there is no reference on East Asian entrepreneurship. This is the first of its kind in the market. The volume provides a useful reference for those who want to know East Asian entrepreneurship and business systems. It also provides many excellent cases and illustrations on the growth of entrepreneurial firms and the rise of branded products in East Asia. Policy makers or scholars who are interested in entrepreneurship, small and medium sized enterprises, Asian business systems, international business, innovation and technology management, economic development, strategic management and East Asian studies would benefit from this volume. The volume contains two parts. The first part is the key concepts associate with entrepreneurship and East Asian firm growth and transformation. The second part presents cases of entrepreneurial firms and their founders in East Asia, including Japan, South Korea, Taiwan, Hong Kong and China. With the handbook, scholars, students and policy makers can grab some basic ideas how entrepreneurs and firms in East Asia compete and survive in the world market and understand why and how East Asia economies can emerge as one of the most dynamic regions in the world. Part I concepts: relating to Entrepreneurship: Guanxi Catching-up strategies Types of entrepreneurship Business System Strategic Management Leadership Part II cases cover a variety from manufacturing to services industries, and specifically including traditional and newly corporations ranging from toys, convenient stores, fast fashion, high-tech, to catering and service. Written by experts in their respective areas, Handbook of East Asia entrepreneurship is an excellent review of theories, policies and empirical evidences on important topics in Entrepreneurship in East Asian economic development. The book is both a superb teaching tool and a valuable handbook in development economics.

A History of Competitive Gaming Lu Zhouxiang 2022-05-13 Competitive gaming, or esports – referring to competitive tournaments of video games among both casual gamers and professional players – began in the early 1970s with small competitions like the one held at Stanford University in October 1972, where some 20 researchers and students attended. By 2022 the estimated revenue of the global esports industry is in excess of \$947 million, with over 200 million viewers worldwide. Regardless of views held about competitive gaming, esports have become a modern economic and cultural phenomenon. This book studies the full history of competitive gaming from the 1970s to the 2010s against the background of the arrival of the electronic and computer age. It investigates how competitive gaming has grown into a new form of entertainment, a sport-like competition, a lucrative business and a unique cultural sensation. It also explores the role of competitive gaming in the development of the video game industry, making a distinctive contribution to our knowledge and understanding of the history of video games. A History of Competitive Gaming will appeal to all those interested in the business and culture of gaming, as well as those studying modern technological culture.

Biometrics in a Data Driven World Sinjini Mitra 2016-12-01 Biometrics in a Data Driven World: Trends, Technologies, and Challenges aims to inform readers about the modern applications of biometrics in the context of a data-driven society, to familiarize them with the rich history of biometrics, and to provide them with a glimpse into the future of biometrics. The first section of the book discusses the fundamentals of biometrics and provides an overview of common biometric modalities, namely face, fingerprints, iris, and voice. It also discusses the history of the field, and provides an overview of emerging trends and opportunities. The second section of the book introduces readers to a wide range of biometric applications. The next part of the book is dedicated to the discussion of case studies of biometric modalities currently used on mobile applications. As smartphones and tablet computers are rapidly becoming the dominant consumer computer platforms, biometrics-based authentication is emerging as an integral part of protecting mobile devices against unauthorized access, while enabling new and highly popular applications, such as secure online payment authorization. The book concludes with a discussion of future trends and opportunities in the field of biometrics, which will pave the way for advancing research in the area of biometrics, and for the deployment of biometric technologies in real-world applications. The book is designed for individuals interested in exploring the contemporary applications of biometrics, from students to researchers and practitioners working in this field. Both undergraduate and graduate students enrolled in college-level security courses will also find this book to be an especially useful companion.

Introduction to Dutch Law Larissa van den Herik 2022-01-27 A standard legal resource since its first edition in 1978, this matchless book has proven itself the ideal overview of Dutch law for foreign lawyers. This Sixth Edition fully updates its systematic description of the legal sources, institutions, and concepts in all major fields of law. Recent developments covered include the progressive implementation of standards set by international conventions, the reorganization of the judiciary, the statute on environmental law, and the (re)codification of private international law. The continuing influence of European law is evident in many fields, perhaps most notably in family law. The various chapters are written by experts – scholars and lawyers – in particular fields, and provide an authoritative overview of each field. The historical sources of Dutch law are discussed, as well as Dutch legal culture, legal philosophy, judicial organization, legal education, and the legal profession. These chapters are followed by introductions to essential issues of private and public law and labour law. The last chapter examines financial law. The only resource of its kind available, this book is unmatched as a thorough guide to further research. It offers practitioners, particularly foreign lawyers, a quick and reliable way into any area of Dutch law that they may be required to research. It will also be of great value to comparatists (especially those studying the influence of European law on national legal systems), scholars, and students. Like previous editions, the Sixth Edition has been prepared under the auspices of the Netherlands Comparative Law Association.

The Routledge Handbook of Health Tourism Melanie Kay Smith 2016-11-10 The Routledge Handbook of Health Tourism provides a comprehensive and cutting-edge overview of the philosophical, conceptual and managerial issues in the field of health tourism with contributions from more than 30 expert academics and practitioners from around the world. Terms that are used frequently when defining health tourism, such as wellbeing, wellness, holistic, medical and spiritual, are analysed and explored, as is the role that health and health tourism play in quality-of-life enhancement, wellbeing, life satisfaction and happiness. An overview is provided of health tourism facilities such as thermal waters, spas, retreats and wellness hotels and the various challenges inherent in managing these profitably and sustainably. Typologies are given not only of subsectors of health tourism and related activities but also of destinations, such as natural landscapes, historic townsquares or individual resorts or attractions around which whole infrastructures have been developed. Attention is paid to some of the lifestyle changes that are taking place in societies which influence consumer behaviour, motivations and demand for health tourism, including government policies, regulations and ethical considerations. This significant volume offers the reader a comprehensive synthesis of this field, conveying the latest thinking and research. The text is international in focus, encouraging dialogue across disciplinary boundaries and areas of study and will be an invaluable resource for all those with an interest in health tourism.

The Social Life of Money Nigel Dodd 2016-02-09 A reevaluation of what money is—and what it might be. Questions about the nature of money have gained a new urgency in the aftermath of the global financial crisis. Even as many people have less of it, there are more forms and systems of money—from local currencies and social lending to mobile money and Bitcoin. Yet our understanding of what money is—and what it might be—hasn't kept pace. In *The Social Life of Money*, Nigel Dodd, one of today's leading sociologists of money, reformulates the theory of the subject for a postcrisis world in which new kinds of money are proliferating. What counts as legitimate action by central banks that issue currency and set policy? What underpins the right of nongovernmental actors to create new currencies? And how might new forms of money surpass or subvert government-sanctioned currencies? To answer such questions, *The Social Life of Money* takes a fresh and wide-ranging look at modern theories of money. One of the book's central concerns is how money can be wrested from the domination and mismanagement of banks and governments and restored to its fundamental position as the "claim upon society" described by Georg Simmel. But rather than advancing yet another critique of the state-based monetary system, *The Social Life of Money* draws out the utopian aspects of money and the ways in which its transformation could in turn transform society, politics, and economics. The book also identifies the contributions of thinkers who have not previously been thought of as monetary theorists—including Nietzsche, Benjamin, Bataille, Deleuze and Guattari, Baudrillard, Derrida, and Hardt and Negri. The result provides new ways of thinking about money that seek not only to understand it but to change it. Complete with a new preface that discusses recent developments in the evolution of money, the book draws out the ways in which its transformation could in turn radically alter society, politics, and economics.

The Handbook of Language, Gender, and Sexuality Susan Ehrlich 2014-03-19 Significantly expanded and updated, the second edition of *The Handbook of Language, Gender and Sexuality* brings together a team of the leading specialists in the field

to create a comprehensive overview of key historical themes and issues, along with methodologies and cutting-edge research topics. Examines the dynamic ways that women and men develop and manage gendered identities through their talk, presenting data and case studies from interactions in a range of social contexts and different communities. Substantially updated for the second edition, including a new introduction, 24 newly-commissioned chapters, ten updated chapters, and a comprehensive index. Includes new chapters on research in non-English speaking countries — from Asia to South America — and cutting-edge topics such as language, gender, and popular culture; language and sexual identities; and language, gender, and socio-phonetics. New sections focus on key themes and issues in the field, such as methodological approaches to language and gender, incorporating new chapters on conversation analysis, critical discourse analysis, corpus linguistics, and variation theory. Provides unrivalled geographic coverage and an essential resource for a wide range of disciplines, from linguistics, psychology, sociology, and anthropology to communication and gender studies.

XIII Mediterranean Conference on Medical and Biological Engineering and Computing 2013 Laura M. Roa Romero 2013-10-01 The general theme of MEDICON 2013 is "Research and Development of Technology for Sustainable Healthcare". This decade is being characterized by the appearance and use of emergent technologies under development. This situation has produced a tremendous impact on Medicine and Biology from which it is expected an unparalleled evolution in these disciplines towards novel concepts and practices. The consequence will be a significant improvement in health care and well-being, i.e. the shift from a reactive medicine to a preventive medicine. This shift implies that the citizen will play an important role in the healthcare delivery process, what requires a comprehensive and personalized assistance. In this context, society will meet emerging media, incorporated to all objects, capable of providing a seamless, adaptive, anticipatory, unobtrusive and pervasive assistance. The challenge will be to remove current barriers related to the lack of knowledge required to produce new opportunities for all the society, while new paradigms are created for this inclusive society to be socially and economically sustainable, and respectful with the environment. In this way, these proceedings focus on the convergence of biomedical engineering topics ranging from formalized theory through experimental science and technological development to practical clinical applications.

Wiley Not-for-Profit GAAP 2016 Richard F. Larkin 2016-04-18 Detailed, practical coverage of GAAP, tailored to not-for-profit organizations Wiley Not-for-Profit GAAP 2016 is a thorough examination of the authoritative standards for measurement, presentation and disclosure as applied to not-for-profit organizations. Due to these organizations' unique characteristics, not-for-profit accountants must adhere to specific Generally Accepted Accounting Principles (GAAP). These requirements are complex and ever evolving, but this single volume brings them together, providing the most up-to-date information available. Flowcharts and diagrams are used to assist the reader's understanding of the material. Additionally, a financial statement disclosure checklist facilitates GAAP adherence. Designed specifically for accountants in public practice and industry, this guide covers requirements from all relevant organizations, including the Financial Accounting Standards Board (FASB) and Accounting Principles Board (APB). Technical and accounting research bulletins are clearly and concisely summarized, as are all statements of position important to not-for-profit organizations. Together, these resources make Wiley Not-for-Profit GAAP 2016 a complete reference tool for auditors and financial personnel in the not-for-profit sector. Refine basic financial statements, including Financial Position, Activities and Cash Flow. Tackle not-for-profit-specific issues like fundraising, non-cash contributions, affiliations and pledges. Tailor accounting methods to the specific type of organization, with budgeting, tax reporting and regulatory advice. Discover how general accounting topics like assets, mergers and liabilities are applied to not-for-profit organizations. Preparer and auditor of not-for-profit accounts must stay up-to-date on the latest GAAP practices to best serve the organization, while complying with all disclosure, reporting and regulatory requirements. Wiley Not-for-Profit GAAP 2016 provides extensive coverage and practical advice on the latest GAAP, tailored to the not-for-profit organization's unique needs.

Re-engineering Manufacturing for Sustainability Andrew Y. C. Nee 2013-04-08 This edited volume presents the proceedings of the 20th CIRP LCE Conference, which cover various areas in life cycle engineering such as life cycle design, end-of-life management, manufacturing processes, manufacturing systems, methods and tools for sustainability, social sustainability, supply chain management, remanufacturing, etc.

The Semantic Web - ISWC 2013 Harith Alani 2013-10-16 The two-volume set LNCS 8218 and 8219 constitutes the refereed proceedings of the 12th International Semantic Web Conference, ISWC 2013, held in Sydney, Australia, in October 2013. The International Semantic Web Conference is the premier forum for Semantic Web research, where cutting edge scientific results and technological innovations are presented, where problems and solutions are discussed, and where the future of this vision is being developed. It brings together specialists in fields such as artificial intelligence, databases, social networks, distributed computing, Web engineering, information systems, human-computer interaction, natural language processing, and the social sciences. Part 1 (LNCS 8218) contains a total of 45 papers which were presented in the research track. They were carefully reviewed and selected from 210 submissions. Part 2 (LNCS 8219) contains 16 papers from the in-use track which were accepted from 90 submissions. In addition, it presents 10 contributions to the evaluations and experiments track and 5 papers of the doctoral consortium.

Learning Embedded Android N Programming Ivan Morgillo 2016-07-29 Create the perfectly customized system by unleashing the power of Android OS on your embedded device About This Book Understand the system architecture and how the source code is organized Explore the power of Android and customize the build system Build a fully customized Android version as per your requirements Who This Book Is For If you are a Java programmer who wants to customize, build, and deploy your own Android version using embedded programming, then this book is for you. What You Will Learn Master Android architecture and system design Obtain source code and understand the modular organization Customize and build your first system image for the Android emulator Level up and build your own Android system for a real-world device Use Android as a home automation and entertainment system Tailor your system with optimizations and add-ons Reach for the stars: look at the Internet of Things, entertainment, and domotics In Detail Take a deep dive into the Android build system and its customization with Learning Embedded Android Programming, written to help you master the steep learning curve of working with embedded Android. Start by exploring the basics of Android OS, discover Google's "repo" system, and discover how to retrieve AOSP source code. You'll then find out to set up the build environment and the first AOSP system. Next, learn how to customize the boot sequence with a new animation, and use an Android "kitchen" to "cook" your custom ROM. By the end of the book, you'll be able to build customized Android open source projects by developing your own set of features. Style and approach This step-by-step guide is packed with various real-world examples to help you create a fully customized Android system with the most useful features available.
