156 pruebas clínicas y optométricas Cordovez, Clemencia 2009-01-08 La optometría es una ciencia que en Colombia inicia a comienzos del siglo XX con profesionales de Europa y Norteamérica formados en el campo de la óptica y con conceptos básicos sobre refracción. En 1954, mediante el Decreto Ley 0825 del 23 de marzo, se modifica el campo de acción de la optometría con características de profesión autónoma, independiente y de proyección social. Casi medio siglo después se reglamenta nuevamente el ejercicio profesional (Ley 372 de 1997), expresando que la optometría es una profesión de la salud que requiere título de idoneidad universitario, basado en una formación científica, técnica y humanística. De esta manera, la actividad del optómetra incluye acciones de prevención y corrección de las enfermedades del ojo y del sistema visual por medio del examen, diagnóstico, tratamiento y adecuado manejo que permitan lograr la eficiencia visual y la salud ocular del paciente, sin descuidar el reconocimiento y diagnóstico de las manifestaciones sistémicas que tienen relación con el ojo, para así preservar y mejorar la calidad de vida del individuo y de la comunidad. La optometría presenta dos ejes para el ejercicio profesional: uno teórico, que proporciona al profesional los fundamentos referentes a las funciones ópticas, visuales y oculares, y uno práctico, que lo capacita en el área clínica. Por lo tanto, es indispensable para el optómetra tener las herramientas básicas que lo guíen y orienten en la integración de estos dos ejes, así como es de gran utilidad establecer, dentro de lo posible, la unificación en la realización de las pruebas clínicas. Por lo anterior, este libro surge con la misión de orientar al estudiante en el por qué, el para qué y el cómo de cada una de las 156 técnicas optométricas que se desarrollan en detalle.

Eye Technician Study Notes Diane Farmer 2013-02-17 A compilation of tidbits and factoids to assist in preparation for JCAHPO testing at COA, COT, and COMT levels. I've had at least a dozen people in the last couple months ask for copies of my self-compiled notes I used for studying for (and passing!) the JCAHPO COA, COT, and COMT tests. Typically when someone asks, I gladly and dutifully run out to Kinko's, copy and print the files, and sometimes have them spiral bound for ease of use as well, and then am reimbursed for the cost. I've finally decided to streamline the process and get out of the middle of it, AND produce a nicer looking product (and save gas money and time in front of the printer, lol!) The factoids are compiled from a multitude of resources through the years and started geared towards the COA. It was then added to and grown as I studied for the COT and COMT exams. I've found that different resources sometimes contradict one another, so occasionally you'll find some contradictions in the notes as well.
