Disability Inclusion and Inclusive Education Sailaja Chennat 2020-02-22 The book approaches the topic of disability, inclusion and inclusive education in a holistic way including both academic and psycho-social perspectives. It also focuses on the contemporary status of disability studies with a multidisciplinary dimension. The experiences and challenges of children with disabilities and the different dimensions of inclusive education have been situated appropriately by including at the outset, a chapter on 'Disability Studies: The Context'. Chapter on 'Sociology of Disability' accentuates the tone and perspective of the presentations of the authors and editor. The research findings presented in the book indicate grounded realities and suggestions for transactional strategies which are plausible in the Indian context. It has never been timely to publish a book that helps professionals who work with schools, special education teachers, and counsellors to analyze disabilities from a socio-psychological perspective keeping the protagonist at the centre. Case narrations situated in the Indian context enrich the presentations giving voice to the marginalized children/adults with disabilities. This work serves as a comprehensive reference for the most prevalent disabilities at school education level covering the conceptual understanding about each disability, their psycho-social perspectives, implications for classroom transactions, suggestions of transactional strategies along with a brief explanation of assistive technology that can be used in case of each disability. With Right to Education Act (2009) in place, a diverse range of readers, from special educators and other teachers in schools, prospective teachers pursuing their pre service teacher education programmes, teacher educators and researchers in the field of disabilities and inclusive education will all find this volume useful, as a reference material with long shelf life.

The Effective Teaching of Language Arts Donna E. Norton 1993 Field-tested and backed by sound research, this popular methods book provides readers with a broad background in language arts, including assessment and instruction in the major areas of speaking, listening, writing, and reading. Thoroughly encompassing the 'back-to-basics' movement and the trend toward literature-based instruction, it offers clearly developed methodologies and lessons, and makes extensive use of children's actual language samples to illustrate ways literature can enhance the development of language arts skills. Written by an award-winning author, the book focuses on material that embraces the needs of all learners: linguistically-different children, multicultural children, and children with learning disabilities and

handicaps. Emphasizing the importance of literature-based strategies and the identification of literature that can be applied to each of the language arts, it offers 'For Your Plan Book', a special section at the end of most chapters which provides concrete ideas, field-tested lessons and unit plans teachers can take right into their classroom. Literature chapters are now moved to the forefront of the book, enabling instructors to place a greater emphasis on literature-related language arts. Strong methodologies in the composition chapters now encompass the writing process, plus results of a five-year composition study of the relationships between writing and literature. Music Teachers' Values and Beliefs Rachael Dwyer 2016-06-03 In Music Teachers' Values and Beliefs, Dwyer investigates the relationships between teachers, learners and music in music classrooms. Using Bourdieu's concepts of habitus and doxa as an interpretive lens, the book explores the values and beliefs of four music teachers, depicted in richly detailed narratives. The narratives are contextualised through the examination of traditions of music and contemporary approaches. In the past, music education has been shaped by elitist tendencies regarding the types of music worthy of study, the ways in which music should be learnt, and the purpose of such learning. Contemporary approaches to music education have enacted significant change in some regions and systems, while others have been slower to leave behind deeply entrenched values, beliefs and practices. These approaches have been blamed for low rates of participation and engagement in school music education, despite the fact that the majority of young people listen to and enjoy music outside of school. This innovative book provides music education researchers and practitioners with a new understanding of the impact of teachers' personal values, beliefs and experiences of music and music education on classroom practice, and the impact this has on students' experiences of music education.
