Responsibility for Drug-induced Injury Graham Dukes 1998 This edition reflects the evolution of legal standards, professional rules, industrial codes of ethics, and court experience in cases involving recompense for medical injury since the 1988 version. While deriving from legal standards of the US, British Commonwealth, European Union, and Nordic Council, a chapter is devoted to issues particular to developing countries. Following an introductory chapter on the emergence and recognition of problems relating to drug safety, 20 chapters cover such areas as: the legal framework (types of proceedings, evidence, and proof); the responsibility of everyone from the government and manufacturer to the prescriber and patient; clinical investigation of drugs; controlled drugs; self-medication; alternative and complementary medicine; and vaccines and biologicals. Includes a table of cases, and table of conventions, statutes, and regulations. Annotation copyrighted by Book News, Inc., Portland, OR

Inquests John Cooper 2011-05-16 The last year has seen the largest and most comprehensive reform of Coronial Law since the early nineteenth century. The new Coroners and Justice Act 2009 impacts upon every aspect of the Inquest and this comprehensive new work lays out both the substantive law and new procedure following the recent legislation and authorities. The whole coronial process is laid out in distinct chapters which consider the present and developing law. The book provides practical guidance from the beginning to the end of the process and includes a special chapter on Military inquests, creating an invaluable reference for both the practitioner and student of this fast developing area of law.

Addictive Disorders in Medical Populations Norman S. Miller 2011-07-26 This book has a much wider focus than traditional books written about drug and alcohol addictions. This unique book is written by medical specialists who diagnose, treat and research addictive disorders in their specialities. Thus, it meets the needs of the typical medical practitioner who wants to learn about and treat patients with addictive disorders in their practices. Because alcohol and drug problems are so prevalent and affect medical conditions profoundly, the medical specialist will improve their knowledge and skill to diagnose and treat addictive disorders in their specialties. Drug and alcohol addictions occur commonly in medical populations; 25-50% of patients seen by primary care physicians have alcohol and drug disorders, with even higher prevalence in certain medical specialty populations. Drug use (including illicit drug use and actual or perceived misuse of prescribed medications), alcohol use, and what has been called unhealthy drinking are even more common in trauma centers and our society. Currently, there are no authoritative addiction texts that focus on the identification, intervention and management of either "addictive disorders in medical populations" or "medical complications in addiction populations". Neurobiological progress in the field of addiction has been amazing and evidence-based treatments have developed at a phenomenal pace, with bench to office applications for tobacco, alcohol and drugs. Pharmacological and psychosocial treatments are described here in detail and in practical terms. The medical and mental complications of addiction are explained comprehensively throughout the text. Clinical considerations are the predominant theme, with the standards of clinical practice grounded in the most current research. The chapters include practical presentations of both clinical and research materials, with instruments for screening and assessment and treatment. It will be useful for all those seeking information to help a patient or family with a tobacco, alcohol or drug problem. We hope this book can give answers and direction to the identification and management of addictions and their medical complications in patient populations.

Drug Court Treatment Ccjp Csac Dokmanus, Stan 2015-06-01 Best Results for clients, families and the criminal justice system can be achieved with this new technology for change for drug court clients and those wishing to stop drinking, drugging or smoking. Improving clinician attending skills and rapport is made easier using the techniques in this book. Recommended for those practitioners interested in "Adjunct Modalities of Treatment for Substance Abuse Counseling" that are new, different and transformative. Have you ever wondered why we don't get better results from treatment? Me too. So I concentrated on what was missing. System goals and conflicts, communication gaps and treatment planning were identified as problems areas. You can use the information in this book and these skills to enhance your Best Practices Evidence Based modalities of treatment. This is applied Cognitive Behavior Theory and brings the CB map to life. Will you spot the visual CBT pun? The foreword tells the story for the reader. It was written by the former Chief Judge and Drug Court Judge (and founder) in my community. If you use one new idea from this book you should get better next level (L+1) results whether you are in need of change, a client or clinician. What new ideas? You might find The Language of Recovery new and different. The Six Steps on The Trail to Transcendence as a stage of change model may be useful. The Treatment Miracle could be what you have been searching for. Being open minded about new

ideas as well as practicing these skills will demonstrate the difference that makes the difference. Clients and clinicians state that this should be taught in the schools. You be the judge. Addiction, An Issue of Psychiatric Clinics - E-Book Itai Danovitch 2012-06-08 This completely new and updated issue takes a focused look at addiction psychiatry in three sections: Diagnostics, Therapeutics, and New Directions. Dr. Danovitch, from Cedars-Sinai and Dr. Mariani from Columbia hone in on the most rapidly advancing and relevant areas of addiction for practitioners today, from defining addiction (implications of DSM-V), to genetics and neurobiology, to specific treatment options for a variety of patient populations: for pregnant women, adolescents, and patients suffering from chronic pain, for example. A variety of addiction types are discussed (ie, opioid, stimulant, and cannabis). The issue closes with discussions of emerging trends, systems of care, investigational therapeutics and the role of the criminal justice system.

Trial and Error in Criminal Justice Reform Greg Berman 2016-03-21 In this revised edition of their concise, readable, yet wide-ranging book, Greg Berman and Aubrey Fox tackle a question students and scholars of law, criminology, and political science constantly face: what mistakes have led to the problems that pervade the criminal justice system in the United States? The reluctance of criminal justice policymakers to talk openly about failure, the authors argue, has stunted the public conversation about crime in this country and stifled new ideas. It has also contributed to our inability to address such problems as chronic offending in low-income neighborhoods, an overreliance on incarceration, the misuse of pretrial detention, and the high rates of recidivism among parolees. Berman and Fox offer students and policymakers an escape from this fate by writing about failure in the criminal justice system. Their goal is to encourage a more forthright dialogue about criminal justice, one that acknowledges that many new initiatives fail and that no one knows for certain how to reduce crime. For the authors, this is not a source of pessimism, but a call to action. This revised edition is updated with a new foreword by Cyrus R. Vance, Jr., and afterword by Greg Berman.

Principles of Addictions and the Law Norman S. Miller 2010-01-30 The book includes an examination of sources of law important to addiction and its treatment. The foundations for forensic work in professional legal testimony is explored (e.g., legal system, case law precedent, statutes governing addictions, civil and criminal procedures). The science of addiction is featured including the biology of addiction, addiction as a brain disease, responsibility vs. loss of control, development of addictions, and the role of genetics and environment. Drug testing, its uses with forensic populations, what the tests show and do not show, controversies in using tests in the general population also receives extensive treatment. Addiction and mental illness in forensic populations is highlighted for addiction treatment and continuing care. Case studies and landmark cases illustrate the role of alcohol, drug use, and addictions in legal decisions. Focused primarily on alcohol and drug addictions Case studies and landmark cases are included to illustrate the role of alcohol/drugs in legal decisions (e.g., the Exxon Valdez case) Brief overview of legal system and drug courts will be useful to clinicians, lawyers, administrators, and other professionals

Drug and Device Product Liability Litigation Strategy Mark Herrmann 2011-12-21 Each year, thousands of lawsuits are filed in federal and state courts seeking recovery from manufacturers of pharmaceuticals and medical devices. These lawsuits include individual actions, actions consolidated into multidistrict litigation, and class actions. The litigation occasionally becomes life-threatening for the defendant corporations, and may breed a public relations nightmare, as occurred with Vioxx, breast implants, and fen-phen. *Drug and Device Product Liability Litigation Strategy*, by Mark Herrmann and David B. Alden, offers assistance to lawyers who practice in this high-stakes, high-profile, and rapidly-evolving area. The book's primary focus is to provide useful practice pointers and overall strategic guidance for attorneys in product liability litigation involving prescription drugs and medical devices. It will serve as an indispensable guide to handling such a case from pre-litigation through trial. The legal landscape in this important area is expected to shift as the Supreme Court's decisions in *Riegel v. Medtronic, Inc.* and *Wyeth v. Levine* are applied, and as the President and Congress address tort reform and other health care issues. Practitioners will need thoughtful, expert advice to navigate these changes.

The Health Care Supervisor Charles R. McConnell 1993 The focus of this classic collection of articles from *The Health Care Supervisor* is legislation and other legal matters as they may affect the working health care supervisor. The book covers issues of liability, legal responsibilities of supervisors, laws that govern some aspects of supervisory conduct, laws regulating employment, and other legal matters from individual privacy to labor unions.

Blaming Mothers Linda C. Fentiman 2019-05-01 A gripping explanation of the biases that lead to the blaming of pregnant women and mothers. Are mothers truly a danger to their children's health? In 2004, a mentally disabled young woman in Utah was charged by prosecutors with murder after she declined to have a Caesarian section and subsequently delivered a stillborn child. In 2010, a pregnant woman who attempted suicide when the baby's father abandoned her was charged with murder and attempted feticide after the daughter she delivered prematurely died. These are just two of the many cases that portray mothers as the major source of health risk for their children. The American legal system is deeply shaped by unconscious risk perception that distorts core legal principles to punish mothers who "fail to protect" their children. In *Blaming Mothers*, Professor Fentiman explores how mothers became legal targets. She explains the psychological processes we use to confront tragic events and the unconscious race, class, and gender biases that affect our perceptions and influence the decisions of prosecutors, judges, and jurors. Fentiman examines legal actions taken against pregnant women in the name of "fetal protection" including court ordered C-sections and maintaining brain-dead pregnant women on life support to gestate a fetus, as well as charges brought against mothers who fail to protect their children from an abusive male partner. She considers the claims of physicians and policymakers that refusing to breastfeed is risky to children's health. And she explores the legal treatment of lead-poisoned children, in which landlords and lead paint manufacturers are not held responsible for exposing children to high levels of lead, while mothers are blamed for their children's injuries. *Blaming Mothers* is a powerful call to reexamine who - and what - we consider risky to children's health. Fentiman offers an important framework for evaluating childhood risk that, rather than scapegoating mothers, provides concrete solutions that promote the health of all of America's children. Read a piece by Linda Fentiman on shaming and blaming mothers under the law on *The Gender Policy Report*.
