Construction Hazardous Materials Compliance Guide R. Dodge Woodson 2012-02-24 Disturbing asbestos materials during construction is a serious hazard that all contractors may encounter. Because of the insidious nature of the material as a health hazard, EPA regulations require that even when a structure is to be completely demolished, asbestos (and all other hazardous materials) must be removed by a qualified contractor prior to general demolition. A construction contractor contemplating abatement work needs to ascertain regulatory applicability under one of the following: OSHA-approved state program, Federal OSHA regulations (applicable to the private sector and certain federal employees) or OSHA-approved. Construction Worksite

Compliance Guide to Asbestos provides the contractors, building owners and inspectors with the current best management practices for asbestos removal and disposal methods. Packed with checklist, tables and "quick lookup" materials, this manual provides a step by step approach for identifying asbestos, complying with OSHA and EPA regulations as well as the safe disposal of asbestos. Ascertain the presence of asbestos through testing Prepare the abatement plan Submit the plan to the state, EPA or local municipality having jurisdiction Proper Waste Disposal techniques Scope of work

Evaluating Employee Training Programs Elizabeth M. Hawthorne 1987 Using a new theory of evaluation research, which is based on social science and economic theory, Hawthorne describes three evaluation methods: benefit-cost analysis, multiattribute utility technology, and impact evaluation. She illustrates the usefulness of each method by using each to evaluate a forty-hour, week-long training program conducted in a high-technology Fortune 500 company. The author shows how her technique for measuring increases in productivity in terms of monetary benefits can be used. She provides specific guidelines to be used by trainers and management in planning and implementing program evaluations. Through her practical application of these methods the author shows how to use evaluation methods to improve training and enhance its impact. Business Library Newsletter This rigorously researched volume explores evaluation methods that can be used to improve employee training for increased benefits to the employer. Hawthorne establishes a historical context for the development of corporate-sponsored employee training programs and evaluation efforts. She then presents a new theory of evaluation research which is grounded in social science and economic theory, and which offers practitioners of employee training a functional vantage point from which to view program evaluation. She provides specific guidelines which will assist educators in preparing evaluation plans, implementing evaluations, and using evaluation techniques to improve the training and to enhance its impact. The author describes three traditional evaluation techniques--benefit--cost analysis, decision analysis, and impact analysis--and reports on the three methods as applied in a management education program offered by a Fortune 500 company for its supervisory and managerial personnel. Hawthorne's technique for measuring increases in productivity in terms of monetary benefits is employed to factor difficult-to measure benefits into a multiple criteria framework of analysis.
