Clausewitz on Strategy Tiha von Ghyczy 2001-05-07 Think about strategy and sharpen judgment in an unpredictable environment Carl von Clausewitz is widely acknowledged as one of the most important of the major strategic theorists; he's been read by Eisenhower, Kissinger, Patton, Chairman Mao, and numerous other leaders. In Clausewitz on Strategy, the Boston Consulting Group's Strategy Institute has excerpted those passages most relevant to business strategy from Clausewitz's classic text On War, the most general, applicable, and enduring work of strategy in the modern West and a source of insight into the nature of conflict, whether on the battlefield or in the boardroom. This book offers Clausewitz's framework for self-education--a way to train the reader's thinking. Clausewitz speaks the mind of the executive, revealing logic that those interested in strategic thinking and practice will find invaluable. He presents unique ideas, such as the idea that friction--unexpected interference--is an intrinsic part of strategy. The Boston Consulting Group is one of the world's leading management consulting firms whose clients include many of the world's industry leaders. Tiha von Ghyczy

(Charlottesville, VA) has been a faculty member and Director of Business Projects at the Darden School of Business since 1996. While with The Boston Consulting Group, he assumed responsibility for the practice groups in manufacturing/time-based competition and high technology. He has published numerous articles and books on vision and strategy. Bolko von Oetinger (Munich, Germany) is a Senior Vice President of BCG. Christopher Bassford (Washington, DC) is presently a Professor of Strategy at the National War College in Washington, DC, and the author of several books, including Clausewitz in English: The Reception of Clausewitz in Britain and America, 1815-1945.

De strateeg Cynthia Montgomery 2012-05-29 Montgomery biedt een nieuw perspectief op strategie en op de onmisbare rol van de leider. Zij laat zien dat strategie niet vooral iets is om de concurrentie te slim af te zijn, maar ook het sterkste middel van een leider om zijn bedrijf vorm te geven. In de kern ervan liggen de fundamentele beslissingen die een leider voortdurend moet nemen over wat zijn bedrijf is en waarom en voor wie het ertoe doet. Er bestaat voor een bedrijf niets belangrijkers. In De strateeg leert Montgomery de lezer hoe hij de vaardigheden en gevoeligheden kan ontwikkelen die nodig zijn voor een levende strategie en werkelijk leiderschap. Er bestaat geen ander boek waarin leiderschap en strategie op zo'n uitdagende, intrigerende en inspirerende manier met elkaar worden verbonden.

Quality by Design Marjorie M. Godfrey 2017-02-13 Quality by Design reflects the research and applied training conducted at Dartmouth Medical School and The Dartmouth Institute Microsystem Academy under the leadership of health care improvement gurus Gene Nelson, Paul Batalden, and Marjorie Godfrey. It's an ideal text for teaching the fundamentals of quality improvement in health care, providing a clear linkage of theory to practice. The second edition advances the clinical microsystem theory by addressing the organizational levels of macrosystems (large entities like hospitals and health care organizations) and mesosystems (intermediate levels of a health care organization, such as information systems, service line programs and centers, and clinical departments, which serve as a link between separate microsystems and support the microsystem by acting as a sort of mediator with the larger macrosystem) in more depth. Field-tested teaching techniques and tools for faculty, interprofessional improvement teams, and leaders of health care systems are presented. New and updated illustrative case studies bring the clinical microsystems approach to life.

Budget Support Versus Project Aid Mr.Tito Cordella 2003-04-01 Should donors who are interested in the effectiveness of developmental programs rely on conditional budget support or on project aid? To answer this question, we present a model in which only a subset of the developmental expenditures can be subject to conditionality. We show that budget support is preferable to project aid when donors and recipients' preferences are aligned, and when assistance is small relative to recipients' resources. Then, we test our model estimating a modified growth model for a panel of developing countries, and find

evidence in support of our predictions.
