The Theology of the Cross in Historical Perspective Anna M. Madsen 2007-01-01 The theology of the cross is indisputably a trendy concept today. Numerous seminars, books, and dissertations tackle the topic. But The Theology of the Cross in Historical Perspective demonstrates that theology of the cross is no passing fancy. Theologies of the cross appear at the beginnings of the church, in the sixteenth-century reformations of the church, and in the more contemporary modernization of the church. Without theologies of the cross, what the church is called to be and to preach becomes unclear. So then, what is the theology of the cross? Anna Madsen surveys the theology of the cross in the thinking of Paul and Luther. She also outlines several important twentieth-century contributions to the subject. On the basis of her analysis, Madsen suggests that the theology of the cross reveals God to be found even in death. In death, after all, boundaries disappear. The theology of the cross assures Christians that God is present in the death of sin and in the realities of suffering and uncertainty. Given that it announces God's presence, the theology of the cross is ultimately a theology of grace, freedom, and trust.

Encyclopedia of Death and Dying Glennys Howarth 2003-12-16 In recent years there has been a massive upsurge in academic, professional and lay interest in mortality. This is reflected in academic and professional literature, in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying. Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns. There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field. This *Encyclopedia* answers that need. The *Encyclopedia of Death and Dying* consolidates and contextualizes the disparate research that has been carried out to date. The phenomena of death and dying and its related concepts are explored and explained in depth, from the approaches of varied disciplines and related professions in the arts, social sciences, humanities, medicine and the sciences. In addition to scholars and students in the field—from anthropologists and sociologists to art and social historians - the *Encyclopedia* will be of interest to other professionals and practitioners whose work brings them into contact with dying, dead and bereaved people. It will be welcomed as the definitive death and dying reference source, and an essential tool for teaching, research and independent study.

A History of Nursing Ideas Linda Andrist 2006 This text is a comprehensive coverage of concepts critical to the development of the nursing role: philosophy, nature of nursing, ways of knowing, influences on the development of the nursing profession, history and nature of nursing science, evolution of nursing practice and education.

The Routledge International Handbook of Goffman Studies Michael Hviid Jacobsen 2022-06-29 This book explores the fertility and enigma of Erving Goffman's sociological reasoning and its capacity to shed fresh light on the fundamental features of human sociality. Thematically arranged, it brings together the work of leading scholars of Goffman's work to explore the concepts and themes that define Goffman's analytical preoccupations, examining the ways these ideas have shaped significant fields of study and situating Goffman's sociology in comparison to some eminent thinkers often linked with his name. Through a series of chapters informed by the same inventive and imaginative spirit characteristic of Goffman's sociology, the book presents fresh perspectives on his contribution to the field and reveals the value of his thought for a variety of disciplines now increasingly aware of the importance of Goffman's sociology to a range of social phenomena. A fresh perspective on the legacy of one of sociology's most important figures, *The Routledge International Handbook of Goffman Studies* will appeal to scholars across the social sciences with interests in interactionist and micro-sociological perspectives.

Social Perspectives on Death and Dying Jeanette A. Auger 2020-07-25T00:00:00Z Death is inevitable, but our perspectives about death and dying are socially constructed. This updated third edition takes us through the maze of issues, both social and personal, which surround death and dying in Canada. Topics include euthanasia and medically assisted death, palliative care and hospices, the high incidence of opioid deaths, the impact of cyber bullying in suicide deaths, the sociology of HIV/AIDS, funeral and burial practices, the high rates of suicide in Canada and dealing with grief and bereavement, among others. Additionally, Auger explores alternative methods for helping dying persons and their loved ones deal with death in a holistic, patient-centred way. Each chapter includes suggested readings, discussion questions and in-class assignments.

Handbook of Death and Dying Clifton D. Bryant 2003 Review: "More than 100 scholars contributed to this carefully researched, well-organized, informative, and multi-disciplinary source on death studies. Volume 1, "The Presence of Death," examines the cultural, historical, and societal frameworks of death, such as the universal fear of death, spirituality and various religions, the legal definition of death, suicide, and capital punishment. Volume 2, "The Response to Death," covers such topics as rites and ceremonies, grief and bereavement, and legal matters after death."--"The Top 20 Reference Titles of the Year," American Libraries, May 2004.

Death: Beyond Whole-Brain Criteria Richard M. Zaner 2012-12-06 From the tone of the report by the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research, one might conclude that the whole-brain-oriented definition of death is now firmly established as an enduring element of public policy. In that report, *Defining Death: Medical, Legal and Ethical Issues in the Determination of Death*, the President's Commission forwarded a uniform determination of death act, which laid heavy accent on the significance of the brain stem in determining whether an individual is alive or dead: An individual who has sustained either (1) irreversible cessation of circulatory and respiratory functions, or (2) irreversible cessation of all functions of the entire brain, including the brain stem, is dead. A determination of death must be made in accordance with accepted medical standards ([1], p. 2). The plausibility of these criteria is undermined as soon as one confronts the question of the level of treatment that ought to be provided to human bodies that have permanently lost consciousness but whose brain stems are still functioning.

Living, Dying, Death, and Bereavement (Volume Two) David E. Balk 2020-10-21 This two-volume book offers extensive interviews with persons who have made significant contributions to thanatology, the study of dying, death, loss, and grief. The book's in-depth conversations provide compelling life stories of interest to clinicians, researchers, and educated lay persons, and to specialists interested in oral history as a means of gaining rich understandings of persons' lives. Several disciplines that contribute to thanatology are represented in this book, such as psychology, religious studies, art, literature, history, social work, nursing, theology, education, psychiatry, sociology, philosophy, and anthropology. The book is unique; no other text offers such a comprehensive, insightful, and personal review of work in the thanatology field. The salience of thanatology is obvious when we consider several topics, including the aging demographics of most countries, the leading causes of death, the devastation of COVID-19, the realities of how most persons die, the growth both of hospice and of efforts within medicine to ensure that a good death becomes the norm of medical practice, and increases in the number of countries and states permitting physician-assisted suicide. This second volume includes conversations with 16 thanatologists, a rich, extensive bibliography, an index of names and subjects, and a biographical sketch of the author. The experts interviewed in this volume include Danai Papadatou, Holly Prigerson, Jack Jordan, Illene Cupit, Heather Servaty-Seib, Irwin Sandler, Simon Shimshon Rubin, Carla Sofka, Harold Ivan Smith, and Phyllis Kosminsky.

Ethnic Variations in Dying, Death and Grief Donald P. Irish 2014-01-02 This volume is directed towards professionals who work in the fields concerning death and dying. These professionals must perceive the needs of people with cultural patterns which are different from the "standard and dominant" patterns in the United States and Canada. Accordingly,

the book includes illustrative episodes and in-depth presentations of selected "ethnic patterns".; Each of the "ethnic chapters" is written by an author who shares the cultural traditions the chapter describes. Other chapters examine multicultural issues and provide the means for personal reflection on death and dying. There are also two bibliographic sections, one general and one geared towards children. The text is divided into three sections - Cross-Cultural and Personal perspectives, Dying, Death, and Grief Among Selected Ethnic Communities, and Reflections and Conclusions.; The book is aimed at those in the fields of clinical psychology, grief therapy, sociology, nursing, social and health care work.

Digital Death Christopher M. Moreman 2014-10 With DeadSocial one can create messages to be published to social networks after death. Facebook's "If I Die" enables users to create a video or text message for posthumous publication. Twitter _LIVESON accounts will keep tweeting even after the user is gone. There is no doubt that the digital age has radically changed options related to death, dying, grieving, and remembering, allowing people to say goodbye in their own time and their own unique way. Drawing from a range of academic perspectives, this book is the only serious study to focus on the ways in which death, dying, and memorialization appear in and are influenced by digital technology. The work investigates phenomena, devices, and audiences as they affect mortality, remembrances, grieving, posthumous existence, and afterlife experience. It examines the markets to which the providers of such services are responding, and it analyzes the degree to which digital media is changing views and expectations related to death. Ultimately, the contributors seek to answer an even more important question: how digital existences affect both real-world perceptions of life's end and the way in which lives are actually lived."

Islam in Historical Perspective Alexander Knysh 2015-09-30 Islam in Historical Perspective integrates history of Islamic societies with discussion of how Muslim scriptures, laws, moral values and myths have shaped lives and thought of individual Muslims and various Muslim communities from the rise of Islam until today. It provides carefully selected historical and scriptural evidence that enables readers to form a comprehensive balanced vision of Islam's evolution. Author Alexander Knysh shows Muslims have made sense of their life experiences by constantly interpreting and re-interpreting Islam's foundational ideas in accordance with ever-changing social and political conditions. In addition to the combined historical and chronological approach, the author offers in-depth discussions of intellectual dialogues and struggles within Islamic tradition. He shows Islam to be a social and political force, while addressing Muslim devotional practices, artistic creativity and structures of everyday life and provides a wealth of historical anecdotes and quotations from original sources that are designed to illustrate principal points.

Dying, Death and Bereavement in a British Hindu Community Shirley Firth 1997 This study is an exploration of the religious beliefs, attitudes, traditions and rituals of a British Hindu community, with respect to dying, death and bereavement. The observations of this community are compared with material obtained during three months of fieldwork in India and ethnographic sources. The primary focus of this study is on individual Hindus, seen in the context of their family and community: their beliefs, experiences and perceptions about death, and their reactions to the changes that take place. It also examines the process of adaptation and change in the death rituals and the role of the pandits in maintaining continuity. The first part of this study sets the context, introducing the issues confronting Hindus facing death and bereavement in Britain. It discusses theoretical issues in a multicultural study as well as beliefs about death and life after death. In the second part, Hindu ritual practices around death are explored, using a model of nine stages from preparation for death to the final post-mortem and annual ancestral rituals. The third part

explores the social and psychological dimensions of death, grief and mourning, the implications of death in hospital and the professional and bureaucratic issues which affect Hindu deaths in Britain. The social aspects of mourning are discussed, with reference to pollution, the role of the family and community, young people and widows. Finally, the author examines the implications of social changes for British Hindus and for those who are involved with them in the caring professions.

Is the Death Penalty Dying? Austin Sarat 2011-01-31 Is the Death Penalty Dying? provides a careful analysis of the historical and political conditions that shaped death penalty practice on both sides of the Atlantic from the end of World War II to the twenty-first century. This book examines and assesses what the United States can learn from the European experience with capital punishment, especially the trajectory of abolition in different European nations. As a comparative sociology and history of the present, the book seeks to illuminate the way death penalty systems and their dissolution work, by means of eleven chapters written by an interdisciplinary group of authors from the United States and Europe. This work will help readers see how close the United States is to ending capital punishment and some of the cultural and institutional barriers that stand in the way of abolition.

Dying and Death in Canada, Fourth Edition Herbert C. Northcott 2021-11-15 The fourth edition of Dying and Death in Canada explores how the intensely personal experience of dying and death is shaped by society and culture, with new discussions of MAID and COVID-19.

Death before Dying Gary Belkin 2014-01-29 Brain death-the condition of a non-functioning brain, has been widely adopted around the world as a definition of death since it was detailed in a Report by an Ad Hoc Committee of Harvard Medical School faculty in 1968. It also remains a focus of controversy and debate, an early source of criticism and scrutiny of the bioethics movement. Death before Dying: History, Medicine, and Brain Death looks at the work of the Committee in a way that has not been attempted before in terms of tracing back the context of its own sources-the reasoning of its Chair, Henry K Beecher, and the care of patients in coma and knowledge about coma and consciousness at the time. That history requires re-thinking the debate over brain death that followed which has tended to cast the Committee's work in ways this book questions. This book, then, also questions common assumptions about the place of bioethics in medicine. This book discusses if the advent of bioethics has distorted and limited the possibilities for harnessing medicine for social progress. It challenges historical scholarship of medicine to be more curious about how medical knowledge can work as a potentially innovative source of values.

Dying and Death in Canada, Third Edition Herbert C. Northcott 2016-07-07 "Dying and Death in Canada offers a comprehensive discussion of dying, death, and bereavement from a Canadian perspective. The third edition has been thoroughly updated and several new topics have been added, including assisted suicide and active euthanasia, end of life care, emerging trends in funerary practices, and changing conceptualizations and interventions in the grieving process. A glossary has also been added along with end-of-chapter review questions and an appendix listing recent and seminal movies, television programs, documentary films, and other visual media sources dealing with dying and death. The new edition includes 22 black and white photos, 4 figures, and 3 tables."--

Understanding Dying, Death, and Bereavement Michael R. Leming 2007 Using a social-psychological approach, this edition remains solidly grounded in theory and research, but

places greater emphasis on the individual and coping with death and dying. These two well-known authors and researchers integrate stimulating personal accounts throughout the text, and apply concepts to specific examples that deal with cross cultural perspectives and the practical matters of death and dying.

Addressing Challenging Behaviors and Mental Health Issues in Early Childhood Mojdeh Bayat 2019-11-27 Now in a fully updated second edition, this essential volume provides research-based strategies to help educators address challenging behaviors in early childhood and elementary years. Drawing on research and approaches from the fields of neuroscience, child development, child psychiatry, counseling, and applied behavior analysis, this text offers teachers simple strategies to manage behaviors and promote mental health and resilience in young children. Thoroughly updated to reflect new developments in neuroscience, trauma, and physical and mental health, this second edition also features an entirely new chapter on classroom approaches in child mental health, including the interaction of technology with challenging behaviors and mental health issues. Comprehensive, multidisciplinary, and culturally responsive, this critical resource provides new and experienced educators and coaches with educational and intervention approaches that are appropriate for all children, with and without disabilities.

Old Age in English History Pat Thane 2000-05-11 At the end of the twentieth century more people are living into their seventies, eighties, nineties and beyond, a process expected to continue well into the next millennium. The twentieth century has achieved what people in other centuries only dreamed of: many can now expect to survive to old age in reasonably good health and can remain active and independent to the end, in contrast to the high death rate, ill health and destitution which affected all ages in the past. Yet this change is generally greeted not with triumph but with alarm. It is assumed that the longer people live, the longer they are ill and dependent, thus burdening a shrinking younger generation with the cost of pensions and health care. It is also widely believed that 'the past' saw few survivors into old age and these could be supported by their families without involving the taxpayer. In this first survey of old age throughout English history, these assumptions are challenged. Vivid pictures are given of the ways in which very large numbers of older people lived often vigorous and independent lives over many centuries. The book argues that old people have always been highly visible in English communities, and concludes that as people live longer due to the benefits of the rise in living standards, far from being 'burdens' they can be valuable contributors to their family and friends.

Dying and Death in Oncology Lawrence Berk 2016-10-11 This book brings together in one volume many important topics about death and dying, including the pathophysiology of death, the causes of death among cancer patients, the ethics of death, the legal aspects of death for the physician and for the patient and caregivers, the economics of death, the medical management of the dying patient, including pain and dyspnea, the prediction of death, and the spiritual management of the dying patient. It also discusses other medical and humanistic aspects of death and dying, such as the historical definition of death and various cultures' and religions' viewpoints on death and the afterlife. Everybody, including every patient with cancer, will die, and every physician will have to assist dying patients. Oncologists face this prospect more often than many physicians. And yet to date there has been no comprehensive textbook on Thanatology, the academic discipline studying death and dying, to assist oncologists in this difficult task. This book will help the physician to understand his or her own relationship with death and to communicate about death and dying with the patient and the patient's caregivers.

Death, Dying and Bereavement in a Changing World Alan R. Kemp 2015-10-16 This title takes a comprehensive approach, exploring the physical, social, psychological, and spiritual dimensions of death, dying, and bereavement. Through personal stories from real

people, Death, Dying, and Bereavement provides readers with a context for understanding their changing encounters with such difficult concepts.

The A-Z of Death and Dying: Social, Medical, and Cultural Aspects Michael John Brennan 2014-02-17 This engaging and informative resource provides readers with an understanding of the social, cultural, and historical influences that shape our encounters with death, dying, and bereavement—a universal experience across humanity. □ Provides comprehensive yet easily accessible and concise entries that offer insight into the expanding study of death, dying, and bereavement □ Contains more than 200 engaging entries from key thinkers and practitioners within the interdisciplinary field of death studies □ Addresses a wide range of topics of both contemporary and historical interest, including memorial tattoos, Facebook grieving, and so-called "dark tourism," which reflect shifting attitudes and practices surrounding end-of-life issues

The Devil from over the Sea Sarah Covington 2022-03-24 In Ireland, few figures have generated more hatred than Oliver Cromwell, whose seventeenth-century conquest, massacres, and dispossessions would endure in the social memory for ages to come. *The Devil from over the Sea* explores the many ways in which Cromwell was remembered and sometimes conveniently 'forgotten' in historical, religious, political, and literary texts, according to the interests of different communities across time. Cromwell's powerful afterlife in Ireland, however, cannot be understood without also investigating his presence in folklore and the landscape, in ruins and curses. Nor can he be separated from the idea of the 'Cromwellian': a term which came to elicit an entire chain of contemptuous associations that would begin after his invasion and assume a wholly new force in the nineteenth century. What emerges from all these memorializing traces is a multitudinous Cromwell who could be represented as brutal, comic, sympathetic, or satanic. He could be discarded also, tellingly, from the accounts of the past, and especially by those which viewed him as an embarrassment or worse. In addition to exploring the many reasons why Cromwell was so vehemently remembered or forgotten in Ireland, Sarah Covington finally uncovers the larger truths conveyed by sometimes fanciful or invented accounts. Contrary to being damaging examples of myth-making, the memorializations contained in martyrologies, folk tales, or newspaper polemics were often productive in cohering communities, or in displaying agency in the form of 'counter-memories' that claimed Cromwell for their own and reshaped Irish history in the process.

Dying and Death in Canada Herbert C. Northcott 2008-01-01 "An exceptional resource for anyone interested in death and dying. Set in the Canadian context, readers travel through the historical, demographic, religious, economic, and cultural terrain that shapes contemporary notions of dying and death." - Laurie Clune, Ryerson University

Counseling Individuals With Life-Threatening Illness Kenneth J. Doka, PhD 2008-09-15 With a Foreword by Robert A. Neimeyer, PhD "Where was this book when I was new as a counselor?...Fortunately, it is here now, and with all the scope, depth, resourcefulness, and balance required for such situations." -Dr. Robert Kastenbaum, PhD "This book will now be an indispensable resource for anyone who wants to understand, counsel, or otherwise help individuals with life-threatening illnesses and their family members." --Charles A. Corr, PhD, CT "Without question, this is the book you'll want your own caregivers to have read should you ever contend with life-threatening illness." --Therese A. Rando, PhD, BCETS, BCBT Life-threatening illness is not only a medical crisis; it is a psychological, social, and spiritual crisis as well. Also, serious illness affects not only the patient, but the patient's family. Therefore, the two major premises of this book are that care in life-threatening illness must be holistic, and it must be family centered. Doka presents an insightful, comprehensive guide for counselors, social workers, and health care professionals, as they assist clients experiencing a serious illness. The book builds on

a model developed by the author, based upon earlier work by Avery Weisman and E. M. Patterson. Doka's model presents illness as a series of phases: Prediagnostic: individuals may decide how to handle troubling symptoms or to take certain diagnostic tests Diagnostic: centered on the existential crisis posed by the diagnosis Chronic: individuals must cope with the disease and treatment Recovery: acknowledges that even when individuals survive an encounter with life-threatening illness, there are still considerable issues that must be resolved Terminal phase: individuals deal with the inevitability of death In his discussion of each phase, the author delineates specific tasks for patients to perform and the issues they must adapt to. He also presents strategies for counselors and health care professionals to use with individuals in each phase of illness.

Perspectives on Death and Dying June L. Leishman 2009 In the past, most people encountered death at a relatively young age. Dying relatives were cared for at home, and mortality rates were higher. Today, there is much less familiarity with death, which increasingly takes place in hospitals, hospices and nursing homes. This wide-ranging and enlightening book offers an exploration of death and dying as human conditions that impact on the individual, their significant others and those involved with their care and well-being. It is aimed at medical and healthcare staff, social workers and counsellors, as well as social sciences and health psychology students, professional health and social care educationalists, and anyone with an interest in this topic. Drawing on aspects of social anthropology, history, and the social and behavioural sciences, the book examines the customs, attitudes and beliefs surrounding death and dying. Emphasis is placed on the unique experience of death for each individual, and the book highlights the challenges faced by those who work with people who are dying or those who have experienced loss through death. In addition, each chapter ends with some reflective questions that allow the reader to consider certain issues at a more personal level.

Dying, Death and Grief Brenda Mallon 2008-07-21 "This book's strengths are [Brenda Mallon's] clinical wisdom, experience and insights, and the practical, constructive, down-to-earth way in which she conveys these to her readers. This will appeal to many who are searching for guidance in the difficult task of providing support for the bereaved" - Bereavement Care, Spring 2010 'This is a well written book that makes a very useful addition to the field' - Therapy Today, February 2009 'A refreshing, down-to-earth text that examines theory and research without becoming an academic tome. It is comprehensive, focused on practice and contains important insights for developing the essential skills required to provide effective bereavement care' - Dr John Costello, Head of Primary Care, University of Manchester 'Brenda Mallon gives the term "grief counselling" definition in a way no one has done before. If you are new to counselling the bereaved, this book is the best introduction I have seen. If you are an experienced grief counsellor, this should be the next book you read' - Professor Dennis Klass, Webster University, Dying, Death and Grief is written for anyone who provides support to adults following bereavement. Whether in a professional or voluntary capacity, bereavement care requires empathy, judgement and skill to ensure your response matches the needs of the person you are helping.

Recognizing that we all experience bereavement differently, this book introduces theory and skills which can be used in any context to address a wide range of needs. The author explains the theoretical background to attachment and loss and the core skills needed to support people who have been bereaved. Case studies and personal accounts illustrate key points and exercises help you examine your own experiences and attitudes in relation to loss. The book also takes into account topics frequently overlooked in other texts, such as sexuality, spiritual responses to loss, cultural influences and diversity, as well as the nature of chronic and disenfranchised grief. Dying, Death and Grief is designed for use on a wide range of training and academic courses that prepare practitioners to work with the

bereaved. Professionals in a range of settings including hospitals and in the community as well as volunteers and be-frienders in hospices and nursing homes will find this a useful source of guidance. Brenda Mallon is a counsellor, trainer and author who specialises in bereavement care. She is vice chair of The Grief Centre, Manchester Area Bereavement Forum.

[Dying, Death, Burial and Commemoration in Reformation Europe](#) Elizabeth C. Tingle 2016-03-09 In recent years, the rituals and beliefs associated with the end of life and the commemoration of the dead have increasingly been identified as of critical importance in understanding the social and cultural impact of the Reformation. The associated processes of dying, death and burial inevitably generated heightened emotion and a strong concern for religious propriety: the ways in which funerary customs were accepted, rejected, modified and contested can therefore grant us a powerful insight into the religious and social mindset of individuals, communities, Churches and even nation states in the post-reformation period. This collection provides an historiographical overview of recent work on dying, death and burial in Reformation and Counter-Reformation Europe and draws together ten essays from historians, literary scholars, musicologists and others working at the cutting edge of research in this area. As well as an interdisciplinary perspective, it also offers a broad geographical and confessional context, ranging across Catholic and Protestant Europe, from Scotland, England and the Holy Roman Empire to France, Spain and Ireland. The essays update and augment the body of literature on dying, death and disposal with recent case studies, pointing to future directions in the field. The volume is organised so that its contents move dynamically across the rites of passage, from dying to death, burial and the afterlife. The importance of spiritual care and preparation of the dying is one theme that emerges from this work, extending our knowledge of Catholic *ars moriendi* into Protestant Britain. Mourning and commemoration; the fate of the soul and its post-mortem management; the political uses of the dead and their resting places, emerge as further prominent themes in this new research. Providing contrasts and comparisons across different European regions and across Catholic and Protestant regions, the collection contributes to and extends the existing literature on this important historiographical theme.
