Zijn we slim genoeg om te weten hoe slim dieren zijn Frans de Waal 2016-04-12 Wat is het verschil tussen menselijke en dierlijke intelligentie, en vooral: hoe komen we daarachter? In 'Zijn we slim genoeg om te weten hoe slim dieren zijn?' maakt Frans de Waal de balans op. Kan een octopus gereedschap gebruiken? Weten chimpansees wat eerlijk is? Kan een vogel raden wat een andere vogel weet? Voelen ratten empathie met hun vrienden? Niet zo lang geleden zou het antwoord op al deze vragen 'Nee' geweest zijn, maar nu zijn we er niet meer zo zeker van. Het zijn vragen die Frans de Waal al zijn hele carrière bezighouden. De laatste jaren heeft het onderzoek naar dierlijke intelligentie een grote vlucht genomen. Onderzoekers proberen zich steeds meer te verplaatsen in het standpunt van dieren en als je goed kijkt, blijken dieren een stuk slimmer te zijn dan we dachten. 'Zijn we slim genoeg om te weten hoe slim dieren zijn?' is een fascinerend boek dat je op een werkelijk andere manier laat kijken naar wat dier én mens kunnen.

Forensic Archaeology W. J. Mike Groen 2015-02-17 Forensic archaeology is mostly defined as the use of archaeological methods and principles within a legal context. However, such a definition only covers one aspect of forensic archaeology and misses the full potential this discipline has to offer. This volume is unique

in that it contains 57 chapters from experienced forensic archaeological practitioners working in different countries, intergovernmental organisations or NGO's. It shows that the practice of forensic archaeology varies worldwide as a result of diverse historical, educational, legal and judicial backgrounds. The chapters in this volume will be an invaluable reference to (forensic) archaeologists, forensic anthropologists, humanitarian and human rights workers, forensic scientists, police officers, professionals working in criminal justice systems and all other individuals who are interested in the potential forensic archaeology has to offer at scenes of crime or places of incident. This volume promotes the development of forensic archaeology worldwide. In addition, it proposes an interpretative framework that is grounded in archaeological theory and methodology, integrating affiliated behavioural and forensic sciences.

Dierenbrein & menselijk Barbara Natterson-Horowitz 2013-01-15 Toen Barbara Natterson-Horowitz naar de dierentuin van Los Angeles werd geroepen bij een aap met een hartkwaal, kwam ze tot een baanbrekend inzicht. Het zou haar werk als cardioloog en psychiater ingrijpend veranderen. Ze ontdekte dat er fascinerend veel overeenkomsten zijn tussen mensen en dieren. Dieren kunnen dezelfde ziektes krijgen als mensen. Als we weten hoe deze ziektes bij dieren kunnen worden bestreden, ligt genezing bij mensen binnen handbereik.

De derde chimpansee Jared Diamond 2013-02-06 Mensen zijn voor 98% genetisch gelijk aan de gewone aap en de dwergchimpansee. Hoe is het dan te verklaren dat wij in staat zijn beschavingen, talen, godsdiensten en wetenschappen te ontwikkelen maar ook om dat in een oogwenk weer te vernietigen? Diamond schreef een baanbrekend, onderhoudend en soms schokkend boek over dat unieke schepsel en zijn evolutie: de derde chimpansee die mens heet. Scherp geschreven, een genot om te lezen. Deze uitdagende stijl van het boek dwingt de lezer ertoe zich grondig te bezinnen op het raadsel van de menselijke evolutie. New York Times Book Review Jared Diamond is hoogleraar fysiologie in Los Angeles. Hij verricht onderzoek op het terrein van de evolutionaire biologie en is bekend als internationale bestsellerauteur van onder andere *Zwaarden, paarden en ziektekiemen* en *Ondergang*.

Anthropology of Violent Death Roberto C. Parra 2023-05-01 The first book to specifically focus on the theoretical foundations of humanitarian forensic science *Anthropology of Violent Death: Theoretical Foundations for Forensic Humanitarian Action* consolidates the concepts and theories that are central to securing the posthumous dignity of the deceased, respecting their memories, and addressing the needs of the surviving populations affected. Focusing on the social and cultural significance of the deceased, this much-needed volume develops a theoretical framework that extends the role of humanitarian workers and specifically the actions of forensic scientists beyond an exclusively legal and technical approach. *Anthropology of Violent Death* is designed to inspire and alert the scientific community, authorities, and the justice systems to think and take actions to avoid the moral injury in society and cultures due to grave disrespect against humanity, its memories and reconciliation. Humanitarian forensic science faces the role of mediator between the deceased and those who are still alive to guarantee the respect and dignity of humanity. Contributions from renowned experts address post-mortem dignity, cultural perceptions of violent death and various mortuary sites, the forms and critical effects of the so-called forensic turn and humanitarian action, the treatment of violent death in post-conflict societies, respect for the dead under International Humanitarian Law (IHL) and Islamic law, the ethical management of the death of migrants, and much more. In an increasingly violent world, this volume, develops a theoretical component for death management in scenarios where humanitarian action is required. *Facilities better understanding between the social sciences, the forensic sciences, and justice systems in situations involving violent death* Discusses the latest theories from leading scholars and practitioners to enhance the activities of forensic scientists and authorities who have the difficult responsibility of making decisions. It provides a better understanding of the humanitarian and cultural dilemmas in the face of violent death episodes, and the unresolved needs of the dignity of the deceased during armed conflicts, disasters, migration crises, including everyday homicides. *Anthropology of Violent Death: Theoretical Foundations for Forensic Humanitarian Action* is an indispensable resource for forensic scientists, humanitarian workers, human rights defenders, and government and non-governmental officials.

Snape Anglo-Saxon Cemetery William Filmer-Sankey 2001 The Snape Anglo-Saxon cemetery stands in the Sandlings area of east Suffolk. The first recorded excavations on the site were conducted in 18623 by the landowner, Septimus Davidson and some friends. In trenching the largest barrow they encountered rivets, and by careful excavation were able to reveal the remains of a complete Anglo-Saxon ship burial, the first to be found in England. Although already robbed, they recovered a number of items including a gold Germanic finger-ring, now in the British Museum, which showed that the burial had been of the highest status. Their excavations also revealed a large number of Anglo-Saxon cremation burials. Subsequently the site was almost forgotten until in 1970 a dowser found an Anglo-Saxon urn in the field to the north of the road, and in 1972 a sewer trench excavated along the road yielded a further nine cremations, one in a bronze bowl (published by West and Owles, 1973). In 1985 a research project was initiated under the aegis of the Snape Historical Trust. Excavations have shown the site to be a mixed cremation and inhumation cemetery. Amongst the inhumations, a wide variety of burial practices has been noted, including the use of two, and possibly three, dugout logboats as burial containers. Other graves made extensive use of organics, in some instances of textile, including the first observed use of Rippenköper weave in England (grave 37). The grave-goods were within the normal range of material to be expected in an Anglo-Saxon cemetery, more exotic finds including a lyre (grave 32) and a horse's head with tack (grave 47). Finds show the cremation burials to date from the late 5th to 7th centuries, and the inhumations to date from the mid 6th to 7th centuries. Other features excavated included ring-ditches, some associated with inhumations, and six burnt stone features, apparently surrounding mound 4. This report attempts to publish all the material known to have been excavated from the cemetery although the urns and their contents from the 18623 excavations have become dispersed over the years and many undoubtedly lost. The 1970 and 1972 finds have also been re-examined, re-drawn and are here republished. The final draft of the text was submitted by the authors in May 1998.

Tussen de wereld en mij Ta-Nehisi Coates 2015-11-18 **WINNAAR VAN DE NATIONAL BOOK AWARD VOOR NON-FICTIE** 2015 'Tussen de wereld en mij' is een lange brief van Ta-Nehisi Coates aan zijn vijftienjarige zoon, waarin hij beschrijft hoe het is om als zwarte jongen op te groeien in Amerika. Een Amerika dat zichzelf voorhoudt dat raciale tegenstellingen tot het verleden behoren, maar waar aanhoudende gewelddadige incidenten tegen de zwarte bevolkingsgroep een andere werkelijkheid laten zien. Coates maakt pijnlijk duidelijk hoezeer racisme in de Amerikaanse cultuur zit verankerd en dat gewelddadige uitpattingen geen toevallige incidenten zijn, maar voortkomen uit scheve machtsverhoudingen en diepgewortelde maatschappelijke noties. Hij kijkt vanuit een historisch perspectief en beschrijft hoe raciale gedachten door de eeuwen heen zijn geëvolueerd. Volgens Coates is racisme vooral een fysieke ervaring, waarbij de lijfelijke dreiging tegen 'black bodies' telkens een andere vorm aanneemt: van slavernij en opsluiting tot buitensporig politiegeweld. Hij neemt de lezer aan de hand mee door zijn leven. Daarbij probeert hij één vraag te beantwoorden: is het in Amerika mogelijk om geweldloos in een zwart lichaam te leven?
