Sexuality, Society & Pedagogy Dennis A. Francis 2013-01-01 Sexuality, Society and Pedagogy problematises some of the prevailing assumptions that frame this area of study. In doing so, it aims to make visible the challenges of teaching sexuality education in South African schools, while demonstrating its potential for reshaping our conceptions of the social and cultural representations thereof. Although the book is largely situated in experiences and perspectives within the South African context, it is hoped that the questions raised, reflections, analyses and arguments will contribute to thinking about sexuality education in diverse contexts, in particular more developing contexts.

Managing in the Global Economy Richard M. Steers 2014-12-18 This definitive text will bring a new level of professionalism to courses in International Management. Truly global in focus, it is a comprehensive primer on the challenges and prospects of international management, with a particular emphasis on developing global managers who are skilled in economics, strategy, and general management. In addition, the authors help readers develop an in-depth understanding of the role of cultural differences in managerial effectiveness. The text is divided into three parts: the emerging global economy; culture, organization, and strategy; and managing global operations. Management topics include: organizing for international business, global business strategy, building strategic alliances, international negotiations, global staffing, managing a competitive workforce, TQM and employee involvement, and managing multicultural teams. Throughout the text, the authors integrate current conceptual materials on global management with in-depth country analyses and real-world business examples. Each chapter begins with an opening case vignette (from countries around the world) and concludes with a list of key terms and in-depth exercises (Global Manager's Workbook). The text also provides country ratings for 50 countries on economic activity, political risk, and cultural differences, as well as a 35 item instrument for students to measure their own cultural awareness

Reviving the Children of Nimrod A. Pinn 2019-06-12 As Anthony Pinn argues in his latest collection, humanism comes in many colors. When more attention is given to issues of race as connected to other forms of oppression, it is easier to see the manner in which humanism has lived and functioned within African American communities. Using the biblical figure Nimrod as symbol, African American Humanist Principles demonstrates African American humanists' intellectual and praxis-related grounding in a history of rebellion against over-determined and oppressive limitations on human doing and being. Pinn maintains that it is this quest for a fuller sense of being - for greater existential and ontological worth - that informs the basic principles of African American humanism. African American Humanist Principles is one of the only books to present the inner workings of humanist principles as the foundation for humanism from the African American perspective - its form and content, nature and meaning.

In the Beginning, Exodus Andrew P. Porter 2008-01-01 How did the Bible come to be written? How did Israelite religion grow out of the surrounding cultures? How did Israelite religion become Christianity and rabbinic Judaism? How did scholars discover this history in the last two centuries? This book is about such questions, and about the ways that Christianity in the modern world became confused, looking for acts of God in the interstices of natural causation rather than in the living-in-history in which the Bible was born. The modern challenges to Christianity are historicism, relativism, and pluralism; and Christianity can learn to receive them as blessings and as offers of grace--as old friends, not as new enemies.

The Great Ordovician Biodiversification Event: Insights from the Tafilalt Biota, Morocco A.W. Hunter Special Publication 485 About 40 million years after the Cambrian Explosion, the Great Ordovician Biodiversification Event (GOBE) represents a second and dramatic burst in marine biodiversity, with major changes in the structure of ecosystems and the progressive replacement of the distinctive Cambrian Evolutionary Fauna by the Paleozoic Evolutionary Fauna. However, the GOBE is not a single, worldwide, short-term event, but rather the complex sum of successive diversifications occurring in distinct taxonomic groups, trophic guilds and regions. This book focuses on the Late Ordovician Tafilalt Biota, Anti-Atlas Morocco, which provides a snapshot of the GOBE in high-latitude regions of the Southern Hemisphere. A series of contributions explore different aspects of the Tafilalt Biota, including its geological setting, the international fossil trade in this area and a series of detailed systematic contributions describing many new taxa of marine invertebrates. This volume represents a significant contribution to the understanding of the Tafilalt Biota and its significance to the GOBE.

The Accountant's Tale Andrew P. Porter 2021-06-08 Three problems in the life of the church: (1) For the past millennium, theologians have done a brisk trade in proofs, arguments for the so-called 'existence' of God, the validity of the Christian faith, and so on. I think this is a mistake: Christianity is a choice. (2) Typical Christian theology begins with Jesus rather than with the Common Documents, the documents shared in common by Christianity and rabbinic Judaism. This is Marcionite Theology, so called for a second-century figure who wanted to delete the Common Documents from the Bible. Many problems in theology become much more tractable if the Common Documents, the Exodus focally, are treated as a model rather than as a mere prologue to the New Testament. (3) There are problems with God interfering with nature, and they have become worse with modern science. God interfering with nature doesn't just injure the sciences, it also generates serious pathologies in theology. The theme is choices made by the church, and the book is called The Accountant's Tale because somebody once asked an accountant, 'What is two times two?' and got the answer, 'What do you want it to be?'
