Corpus Linguistics, Context and Culture Viola Wiegand 2019-11-18 Corpus Linguistics, Context and Culture demonstrates the potential of corpus linguistic methods for investigating language patterns across a range of contexts. Organised in three sections, the chapters range from detailed case studies on lexico-grammatical patterns to fundamental discussions of meaning as part of the 'discourse, contexts and cultures' theme. The final part on 'learner contexts' specifically emphasises the need for mixed-method approaches and the consideration of pedagogical implications for real world contexts. Beyond its contribution to current debates in the field, this edited volume indicates new directions in cross-disciplinary work.

Advances in Mixed Methods Research Manfred Max Bergman 2008-05-06 Advances in Mixed Methods Research provides an essential introduction to the fast-growing field of mixed methods research. Bergman's book examines the current state of mixed-methods research, exploring exciting new ways of conceptualizing and conducting empirical research in the social and health sciences. Contributions from the world's leading experts in qualitative, quantitative, and mixed methods approaches are brought together, clearing the way for a more constructive approach to social research. These contributions cover the main practical and methodological issues and include a number of different visions of what mixed methods research is. The discussion also covers the use of mixed methods in a diverse range of fields, including sociology, education, politics, psychology, computational science and methodology. This book represents an important contribution to the ongoing debate surrounding the use of mixed methods in the social sciences and health research, and presents a convincing argument that the conventional, paradigmatic view of qualitative and quantitative research is outdated and in need of replacement. It will be essential reading for anyone actively engaged in qualitative, quantitative and mixed methods research and for students of social research methods. Manfred Max Bergman is Chair of Methodology and Political Sociology at the University of Basel.

Model to Monetarily Aggregate Risks of Procurement to Support Decision Makers Philipp von Cube 2019-11-05 The present thesis provides a model to monetarily aggregate procurement risks to support decision makers. A material flow oriented view forms the fundament of the model. The model is designed to aggregate delay, quality and cost related procurement risks considering their uncertainty. Procurement risks are aggregated to form a monetary risk distribution. Decision-makers can select procurement strategies that are adequate for their risk situation, depending on their affinity for risk to mitigate

procurement risks.
