Salons, History, and the Creation of Seventeenth-century France Faith Evelyn Beasley 2006 The first half of the book is a detailed study of how the salons influenced the development of literature. Beasley argues that many women were not only writers, they also served as critics for the literary sphere as a whole. In the second half of the book Beasley examines how historians and literary critics subsequently portrayed the seventeenth century literary realm, which became identified with the great reign of Louis XIV and designated the official canon of French literature. Beasley argues that in a rewriting of this past, the salons were reconfigured in order to advance an alternative view of this premier moment of French culture and of the literary masterpieces that

developed out of it. Through her analysis of how the seventeenth century salon has been defined and transmitted to posterity, Beasley illuminates facets of France's collective memory, and the powers that constituted it in the past and that are still working to define it today.

Liar's Landscape Malcolm Bradbury 2006 This final volume from the great novelist and critic "is essential reading for all admirers of Malcolm Bradbury and, for those who don't know his work, an invaluable sampler of his worldly-wise humor and satirical wit."

—Independent When Sir Malcolm Bradbury died in 2000, he left behind a lifetime's work: published and unpublished; fiction and nonfiction; short stories and novels; completed work and work in progress. Given shape and coherence by his son, Dominic, that work has now become *Liar's Landscape*—a book about books, about writing and writers, and, of course, about being Malcolm Bradbury. Taking the reader from unfinished novels to unsent letters, and from prose to plays, it is eloquent evidence of Bradbury's versatility, wit, and passion for the written word.

A number of classroom-tested graphics--charts, tables, diagrams--supplemented this text by identifying essential doctrinal components and illustrating important doctrinal relationships.

Ritchie 2008 *Mastering Legal Analysis and Communication* is designed to help novices navigate the often difficult task of learning new ways of thinking and communicating. Mastering the Techniques of Teaching Joseph Lowman 1995-09-15 Since the publication of the first edition of *Mastering the Techniques of Teaching* in 1984, national interest in promoting effective college teaching has risen to an all-time high. While Joseph Lowman's revised second edition of this widely praised work retains the vision of exemplary teaching presented in the original, it has been completely updated to reflect the results of a wealth of additional research--140 new references appear in this second edition--and practice. Lowman presents for the first time a new learning model that details the relative strength of six sources of influence on what and how much students learn in a college course. He expands his earlier model of effective teaching to place more emphasis on motivational skill and commitment to teaching. And he presents still more options on how to organize classes and use group work to promote learning. This second edition also includes an expanded checklist to help college teachers analyze their classroom performance on videotape, detailed instructions on how to use videotape analysis to improve teaching, and a new approach to evaluating college teaching based on Lowman's expanded model of exemplary teaching.

This book is part of the Carolina Academic Press Mastering Series edited by Russell L. Weaver, University of Louisville School of Law.
