Manual of Critical Care Nursing Marianne Saunorus Baird 2015-10-01 The compact, yet comprehensive, Manual of Critical Care Nursing: Nursing Interventions and Collaborative Management, 7th Edition is your students' go-to reference forto help you provide safe, high-quality nursing care in the clinical/critical care settings. Written in an abbreviated outline format, this easy-to-use Manual presents essential information on more than 75 disorders and conditions, as well as concepts relevant to caring for all critically ill patients and functioning in the critical care environment. Award-winning clinical nurse specialist Marianne Baird separates the content first by body system and then by disorder, with each disorder including a brief description of pathophysiology, assessment, diagnostic testing, collaborative management, nursing diagnoses, desired outcomes, nursing interventions, and patient teaching and rehabilitation. With the latest NANDA-I nursing diagnoses and new sections on Bariatric Considerations and Caring for the Elderly, this practical manual is designed to help critical care nurses and nursing students better care for any critically ill patient. Coverage of more than 75 disorders most commonly seen in critical care units. Consistent, easy-to-use format facilitates quick reference so you can find information exactly where you expect it to be. Portable size makes it ideal for use in the unit or bedside, and is also easy to carry on campus. Research Briefs boxes present abstracts of selected research studies and emphasize the use of evidence to guide care recommendations. NANDA-approved diagnoses are marked with an icon to familiarize you with NANDA terminology. Chapters mirror a practicing nurse's approach to patient care, making it quicker and easier to find information. Diagnostic Tests tables highlight the definition, purpose, and abnormal findings for each test. Collaborative Management tables concisely summarize relevant performance measures while incorporating the best available patient care guidelines. Safety Alert! and High Alert! icons call attention to issues important to a patient's safety. Chapter outlines display major heads, care plans, and their respective page numbers - and provide easy access to disorders. NEW! Bariatric Considerations section added to assessment sections to help you assess, and prevent complications and improve care in, overweight and obese patients. NEW! Section on Caring for the Elderly added to assessment sections to provide you with tips and guidelines unique to elderly patients, including recognizing differences in measuring pain, providing appropriate nutritional support, improving communication, and preventing infection. NEW! Updated content throughout keeps you current in the field of critical care nursing. NEW! Geriatric icon highlights considerations relating to the care of older adults. NEW! The latest NANDA-I nursing diagnoses ensure you stay up-to-date.

The Mollusks Charles F. Sturm 2006 Mollusks have been important to humans since our earliest days. Initially, when humans were primarily interested in what they could eat or use, mollusks were important as food, ornaments, and materials for tools. Over the centuries, as human knowledge branched out and individuals started to study the world around them, mollusks were important subjects for learning how things worked. In this volume, the editors and contributors have brought together a broad range of topics within the field of malacology. It is our expectation that these topics will be of interest and use to amateur and professional malacologists.

The Coin Collector's Survival Manual Scott A. Travers 1996 The award-winning title has now been revised to offer the most up-to-date information and consumer protection advice available.

Deep-Sky Companions: The Caldwell Objects Stephen James O'Meara 2016-09-26 The Caldwell Catalogue, compiled by the late Sir Patrick Moore (1923-2012), has delighted amateur astronomers worldwide since its publication in 1995. Twenty years on, Stephen James O'Meara revisits his guide to these 109 deep-sky delights, breathing new life into them and the 20 additional observing targets included as an appendix. This second edition retains O'Meara's detailed visual descriptions and sketches, accompanied by stunning new images taken by amateur photographer Mario Motta and observations by Magda Sreicher. The astrophysical descriptions have been updated to account for the many advances in our understanding of the objects, not least due to an armada of space-borne observatories and the new technologies used in large ground-based telescopes. Ideal for observers who have completed the Messier objects and are looking for their next challenge, Deep-Sky Companions: The Caldwell Objects is a fitting tribute from a renowned visual observer to one of astronomy's most famous personalities.

Astrophysics and Space Science L.B.F.M. Waters 2012-12-06 The successful launch on November 17, 1995 of ESA's Infrared Space Observatory (ISO) by means of an Ariane 4 carrier, has set in motion a true revolution in quantitative infrared astronomy. For the first time since the very successful IRAS mission in 1983, the astronomical community has uninterrupted access to the infrared part of the electromagnetic spectrum. The four focal plane instruments on board of ISO (the camera ISOCAM, the photometer/camera ISOPHOT, and the short and long wavelength spectrographs ISO-SWS and ISO-LWS), perform very well and live up to the high expectations all of us had at launch. In the spring of 1996, Thijs de Graauw (principal investigator of the SWS) first suggested the idea to organize a conference dedicated to ISO results in the area of stars and circumstellar matter, and coined the title ISO 's View on Stellar Evolution. At the first scientific meeting to highlight some of the early ISO results which was held in May of 1996 at ESA's laboratory ESTEC in Noordwijk, the Netherlands, the conference was announced and a preliminary science organizing committee was formed. The conference was held from July 1 to 4, 1997, in conference centre de Leeuwenhorst, Noord wijkerhout, the Netherlands. The conference was opened by the Director of ESA 's Science Programme, Professor R. Bonnet.

Concise Catalog of Deep-sky Objects W.H. Finlay 2006-04-18 Here is a unique and fascinating reference book for every serious deep-sky observer! Entries for each of more than 500 deep-sky objects provide far more than the usual astronomical data – they also detail, in every case, the most interesting facts. Physical factors, astrophysical information, evolution, unusual features, the list is endless. The objects are all listed in NGC order. Astronomers can now get an insight into exactly what they are looking at, to add a new level of insight and enjoyment to deep-sky observing.

Evidence Based Medicine Nikolaos Sitaras 2012-04-11 Evidence-based medicine (EBM) was introduced to the best benefit of the patient. It has transformed the pathophysiological approach to the outcome approach of today's treatments. Disease-oriented to patient-oriented medicine. And, for some, daily medical practice from patient oriented to case oriented medicine. Evidence has changed the paternalistic way of medical practice. And gave room to patients, who show a tendency towards partnership. Although EBM has introduced a different way of thinking in the day to day medical practice, there is plenty of space for implementation and improvement. This book is meant to provoke the thinker towards the unlimited borders of caring for the patient.

Deep-Sky Video Astronomy Steve Massey 2009-04-21 Deep-Sky Video Astronomy is a concise guide to using modern integrating video cameras for deep-sky viewing and imaging with the kinds of modest telescopes available commercially to amateur astronomers. It includes an introduction and a brief history of the technology, camera types, etc. The authors then examine the pros and cons of this unrefrigerated yet highly efficient technology, which is already beginning to compete with expensive astronomical cooled-chip CCD cameras in quality and ease of use. There is a thorough examination of accessories used to achieve particular results. Examples are focal reducers, Barlow lenses, and optical filters. However, the focus is mostly on the practical side of creating beautiful and detailed astronomical portraits using image-stacking software, enhancement tools like PhotoShop, and creating color images with a black-and-white camera. Practical step-by-step examples supported by tried and trusted tips show how to achieve the best possible deep-sky video portrait!

The Coin Collector's Survival Manual, Revised Seventh Edition Scott A. Travers 2015-09-01 Revised and Updated for the Gold Rush From one of the world's most knowledgeable coin dealers—a former consultant to the Federal Trade Commission who is often quoted by the Wall Street Journal—comes a thorough update of the most-trusted consumer protection handbook to buying and selling rare and valuable coins. Illustrated with black-and-white photographs and a full-color insert, *The Coin Collector's Survival Manual, Seventh Edition* is indispensable for seasoned collectors and novices alike. This substantially revised edition of the *Coin Collector's Survival Manual* includes revised chapters that focus on legal and financial advice for buying and selling coins, and a new chapter on the most secure way to detect coins that have been "doctored." You will learn how to: • Avoid scams when buying and selling gold • Understand the new coin grading system • Detect altered, counterfeit, and doctored coins • Know how high gold and silver coins will climb in value • Buy coins through Internet auctions—and avoid the pitfalls • Safeguard and protect your coins from disaster ABOUT THE AUTHOR: Scott Travers, former vice president of the American Numismatic Association, was called the "preeminent consumer advocate in the numismatic field" by The New York Times. He is a contributor to all the leading coin publications and served as a coin valuation consultant to the Federal Trade Commission. He has been featured as a coin expert in Barron's, Business Week, The WSJ, MSNBC and TODAY.
