Standards of Excellence in Budget Presentation Denny G. Bolton 2003-01-10 This guide describes the Meritorious Budget Awards Program recognizing excellence in school system budgeting awarded by the Association of School Business Officials. The award is designed to help school business administrators achieve a high standard of excellence in budget presentations. Chapters provide the expectations and relevant criteria used by the award committee reviewing budget presentations, and they include a checklist and numerous exhibits from past presentations. (TEJ)

Forecast and Solution Ike Jeanes 1996 EVERYONE'S GUIDE - FORECAST & SOLUTION introduces new, easy-to-use statistical methods so that the reader can answer the questions: How long will nuclear peace tend to continue? And, what can be done to extend it further? Dietrich Fischer, a past MacArthur Fellow at Princeton, was emphatic: "This is an original & highly readable contribution to the most important issue facing humanity today - surviving the nuclear threat. Jeanes combines lucid common sense with mathematical rigor in this landmark work. Anyone with an interest in having a future should read this work." Similarly, another distinguished scholar & author in the field declared, "It was more than interesting: it was completely fascinating." The general literate reader can assess when a nuclear use (small or otherwise) would tend to occur at probabilities from 1% to 99.9%, & what precisely can be done to forestall such use. Jeanes debunks deterrence theory, illustrates consequences of proliferation, & provides a unified explanation for warfare, conventional & nuclear. A comprehensive work - ethical, political, historical, analytical. 100+ Graphs & Tables, 1,500+ footnotes. TOLL-FREE, 24 hours-a-day, credit card line (800) 448-3330; Publisher: (800) 446-0467.

ball, and what happens when he makes contact—reverse engineering those skills back into batting average. The result is an unparalleled forecast of baseball abilities and trends for the upcoming season and beyond.

The Signal and the Noise Nate Silver 2012-09-27 Every time we choose a route to work, decide whether to go on a second date, or set aside money for a rainy day, we are making a prediction about the future. Yet from the global financial crisis to 9/11 to the Fukushima disaster, we often fail to foresee hugely significant events. In *The Signal and the Noise*, the New York Times' political forecaster and statistics guru Nate Silver explores the art of prediction, revealing how we can all build a better crystal ball. In his quest to distinguish the true signal from a universe of noisy data, Silver visits hundreds of expert forecasters, in fields ranging from the stock market to the poker table, from earthquakes to terrorism. What lies behind their success? And why do so many predictions still fail? By analysing the rare prescient forecasts, and applying a more quantitative lens to everyday life, Silver distils the essential lessons of prediction. We live in an increasingly data-driven world, but it is harder than ever to detect the true patterns amid the noise of information. In this dazzling insider's tour of the world of forecasting, Silver reveals how we can all develop better foresight in our everyday lives.
