Introduction to Child Development - SAGE Publications Inc

Psychodynamic theories have their roots in the work of Sigmund Freud whose views stemmed from his experiences of treating individuals suffering from a variety of neuroses. Freud concluded that human development is essentially driven by conflict. We have basic aggressive and sexual instincts that need to be satisfied, but we live in a society where

Consumer Behaviour Theory - Approaches & Models

The psychodynamic tradition within psychology is widely attributed to the work of Sigmund Freud (1856-1939) (Stewart 1994). This view posits that behaviour is subject to biological influence through 'instinctive forces' or 'drives' which act outside of conscious thought (Arnold, Robertson et al. 1991). While Freud identified
