The Hybrid Factory in Europe H. Kumon 2004-08-31 This book evaluates the conditions for the international transfer of Japanese-style management and production techniques to Europe. Using an investigation of Japanese manufacturing companies with operations in Europe, the authors shed light on 'hybrid factories', which combine elements of Japanese and European management and production techniques.

Internet Marketing Dave Chaffey 2000 Internet Marketing is a comprehensive guide to how organisations can use the internet to support their marketing activities. Building on traditional marketing theory and concepts together with emerging academic literature, the book details a structured approach to applying the internet for marketing. The book is intended to support readers who are, or will be involved with using the internet in different capacities from integrating its use with existing marketing and communications strategies through to those involved with the creation and maintenance of web sites. It assumes no knowledge of the application of the Internet to marketing and basic concepts and terms are explained before exploring more advanced topics. Internet Marketing: *explains the key similarities and differences between marketing using the internet and other media; *shows how innovative companies are moving beyond 'static' brochureware pages to provide dynamic, interactive content to build personalised relationships with customers; *goes beyond the use of the web site as a communications tool to explain the impact of the internet on distribution channels, market places and relationships with business partners; *explor

How to Live a Low-Carbon Life Christopher Goodall 2012-05-04 Climate change is the greatest challenge facing humanity: drastic reduction of carbon emissions is vital if we are to avoid a catastrophe that devastates large parts of the world. Governments and businesses have been slow to act and individuals now need to take the lead. The Earth can absorb no more than 3 tonnes of carbon dioxide emissions each year for every person on the planet if we are to keep temperature and rainfall change within tolerable limits. Yet from cars and holiday flights to household appliances and the food on our plates, Western consumer lifestyles leave each of us responsible for over 12 tonnes of carbon dioxide a year - four times what the Earth can handle. Individual action is essential if we want to avoid climate chaos. How to Live a Low-Carbon Life shows how easy it is to take responsibility, providing the first comprehensive, one-stop reference guide to calculating your CO2 emissions and reducing them to a sustainable 3 tonnes a year.

New Car Buying Guide, 2004-2005 Consumer Reports (Firm) 2004-06 Based on tests conducted by Consumers Union, this guide rates new cars based on performance, handling, comfort, convenience, reliability, and fuel economy, and includes advice on options and safety statistics.
